Chapter 1
Introduction
Purpose of Integrated Waste Management Plan

This plan has been prepared by the Confederated Tribes of the Coos, Lower Umpqua & Siuslaw as a guide to develop and implement an effective integrated waste management program specific to the tribe’s needs. The Plan will assist the Tribes with making decisions to improve the lands, air, water, and cultural resources in the Tribes’ Ancestral Territory for future generations. This plan includes the identification of existing waste systems and waste reduction strategies, implementation, monitoring and outreach methods.

Federal, State, and Other Agencies Involved

The United States has a unique legal relationship with Tribal governments based on specific constitution, treaties, statutes, executive orders, and court decisions. Under the American legal system, Indian tribes have sovereign powers separate and independent from the federal and state governments. This means that Tribal governments have the same powers as the federal and state governments to regulate their internal affairs, with a few exceptions. For instance, tribes have the power to form a government, to decide their own membership, the right to regulate property, the right to maintain law and order, the right to regulate commerce, and so on.

Because of the unique nature of Tribal sovereignty and specific federal legislation recognition, various governmental agencies are involved in assisting Indian tribes. Agencies assisting tribes with solid waste management needs and concerns are listed in Appendix A.

Pertinent Laws & Regulations

Native American tribes play an increasingly critical role in regulating the environment on Indian lands. Although tribes are increasing their own regulatory authority, the EPA retains jurisdiction over all pollution sources until a program has been delegated to the tribe. Indian tribes must qualify for the "delegation" of a program under the various environmental protection laws administered by the EPA. A list of Federal laws and regulations concerning solid waste management issues is included in Appendix A.

State power over activities on Indian reservations generally is narrow. Although tribes are required to follow federal laws and regulations, tribes may incorporate state laws and regulations (when applicable) when addressing environmental issues generally at their own discretion. There is potential for overlap and conflict among tribal, state, and federal regulations.

Tribal Statements and Waste Management Goals

“As a sovereign nation, we honor and look to our ancestors thousands of years of experience on the land, as we guide the Tribes forward for the next seven generations; promoting healthy, successful families; affirming and nurturing our culture, acknowledging our responsibility to the land and the Tribal community.”

“The Confederated Tribes have had continuous government of, by, and for the Tribes since Time Immemorial...The Confederated Tribes has the rights and responsibilities of any government to its people and their resources. To this end, the Department of Natural Resources was established to conserve and manage resources on Tribally-held lands and to work with other governments to influence conservation and management of resources throughout the Tribes’ Ancestral Territory.”

This integrated waste management plan has been developed to provide the tribal decision makers and
members with a set of goals and policies to implement, monitor and evaluate future waste management activities. Based on the mission of the Tribes and the Department of Natural Resources, the following goals and objectives for the Integrated Waste Management Plan have been adopted:

- Maintain and improve Tribal environmental quality
- To complete and update a Tribal Integrated Waste Management Plan that outlines an appropriate balance of waste prevention, reuse, recycling, and disposal.
- Meet waste disposal and recycling needs for Tribal facilities and reduce waste generation
- Develop a waste hierarchy of waste reduction, recycling, composting, and disposal
- Ensure environmental protection through proper disposal of municipal waste, construction and demolition wastes, and other special wastes (household hazardous waste, industrial waste, asbestos, appliances, electronic equipment, tires, motor oil, etc)
- Evaluate cost effectiveness of implementing Tribal Integrated Waste Management Plan
- Develop Tribal Code respective to management and enforcement of an Integrated Waste Management Plan

Current objectives:

- Establish a cost effective and efficient system for managing the Integrated Waste Management Plan
- Obtain funding for expanding waste management services, outreach, and/or facilities.
- Provide easily available and convenient recycling information and/or opportunities and access for Tribal members, Tribal housing, and Tribal government.
- Educate and involve citizens in waste reduction, recycling efforts, and responsible waste management.
- Promote collection services that balance administrative efficiency, cost effectiveness and aesthetics.
- Utilize to the fullest extent possible existing facilities and systems.
- Manage the system to protect public health and the environment.
- Ensure that special wastes are handled, recycled or disposed of in a safe manner.

Future Objectives:

- To improve efficiency, quality, and coverage of waste systems at Tribal government and housing facilities.
- Further promote waste reduction, reuse, and recycling as preferred long-term strategies for reducing the amount of waste disposed in landfills
- Provide additional waste management services and facilities as the need arises.
- Address and support strong enforcement of waste issues.
- Take advantage of alternatives for yard and wood waste and other potentially recyclable materials.
- Work with the Tribal enterprises to reduce waste, improve recycling and integrate composting.
- Continue outreach for reduction of toxic materials in landfill.
- Support environmentally sound waste disposal alternatives for Tribal members.
Description of Lands and Ancestral Lands

The lands of the CTCLUSI Ancestral Territory, encompasses 1.6 million acres of lands at or adjacent to the Pacific Ocean. The landscape ranges from beaches to coastal lakes to rivers to dunes and forests. The area remains relatively low in population density and contains some of North America’s most extensive forests. The region contains a diversity of natural resources for industries such as mining, logging, fishing, agriculture, and tourism.

This section contains a general description of the existing land use of the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Ancestral and Tribal lands. Tribal lands range from urban to rural. Urban areas include the cities Coos Bay, Reedsport, Florence located near the mouth of the Coos, Umpqua and Siuslaw Rivers (respectively). Table 1-3 contains a breakdown of land use on the various Tribal lands.

This section of the plan includes a general description of the land use on the reservation, including geography, rural vs. urban nature, and land use types. For this section, the following information should be included:
- General location of development (north, south, east and west)
- General location of rural areas (north, south, east and west)

### Land use on CTCLUSI Tribal land (also see map next page)

<table>
<thead>
<tr>

<td>35</td>
<td>294</td>
<td>398</td>
<td></td>
</tr>
</tbody>
</table>

*near to administration services is defined as adults residing in Lane (134), Coos (136), or Douglas (24) counties

Existing Systems Overview

The existing numbers of members residing on CTCLUSI Tribal lands are 35. Tribal housing residents have garbage and recycling costs paid for by the Tribe.

The majority of waste originating from a Tribal household or government facility (Florence Outreach) or enterprise in the Florence area is collected by Central Coast Disposal or transported for disposal to Florence Transfer Station (see Chapter 3 for more information). The waste from the Eugene/Springfield Outreach waste and recycling is collected by a contractor and transported for disposal or recycling. The majority of waste and recycling originating from a Tribal households (Qaxes Heights), government facilities (Administration Offices) or enterprises in Coos county, is collected by Les County Sanitary and transported for disposal or recycling.

The year-round adult population of the Tribal members is 727; however, CTCLUSI tribe operates the Three Rivers Casino and Hotel and Ocean Dunes golf course located in Florence, Oregon, attract visitors from outside the reservation. As the Integrated Waste Management Program continues to develop, CTCLUSI should strive to better understand and assist the casino and golf course with waste reduction methods and disposal options for these enterprises.

Annual Waste Generation

The calculated waste generation per day per person living in the United States in 2011, based on EPA Municipal Solid Waste webpage\(^1\), was 4.40 pounds and recycling accounted for 1.53 pounds. Using this formula and assuming that Tribal membership acts similarly to the typical US population, the annual waste produced by the Tribe is 1,167,562 pounds.

### Population and Solid Waste Generation Projections

Chapter 3

Waste Systems Available
WASTE COLLECTION AND DISPOSAL GOALS

This chapter presents a description of the existing waste system utilized by CTCLUSI government offices and Tribal housing.

Waste collection systems will be evaluated for their ability to meet existing and projected needs within the framework of the following goals:

- Meet waste disposal and recycling needs for Tribal facilities
- Develop a waste hierarchy of waste reduction, recycling, composting, disposal and incineration
- Ensure environmental protection through proper disposal of municipal waste, construction and demolition wastes, and other special wastes (household hazardous waste, ash, sludge, industrial waste, asbestos, appliances, electronic equipment, tires, motor oil, etc)
- Evaluate cost effectiveness of implemented Integrated Waste Management Plan
- Develop Tribal Code respective to management and enforcement of Integrated Waste Management Plan

These goals were developed to address waste collection needs for CTCLUSI and are derived from the overall Tribal Integrated Waste Management Plan goals identified in Chapter 1.

Collection

Currently Tribal government and Tribal Housing waste is collected by Les County Sanitary, in Coos county, and Central Coast Disposal, in Lane County, depending on the location of the Tribal facility. Waste collected is paid for through Indirect funding (account code 7260).

- Due to lack of funding resources, CTCLUSI will not pursue the option of operating a waste collection facility for waste disposal or recycling
- Tribal members living off Tribal lands are advised to take their recycling to appropriate recycling facilities, such as transfer stations.
- Although there is no recycling facility on CTCLUSI lands, educating Tribal members and Tribal Administration that taking appropriate recyclable materials to transfer stations will help reduce costs for waste disposal and assist in protecting environmental quality and Tribal cultural resources

EXISTING FACILITIES FOR GARBAGE AND RECYCLING IN COOS, DOUGLAS, AND LANE COUNTIES

Transfer Stations and Landfills near to Tribal Lands

Coos County (See Appendix B-1)
- Transfer Stations
  - Beaver Hill Disposal Site and West Coast Recycling and Transfer Station (private business)
- Landfill
  - Beaver Hill Disposal Site

Douglas County (See Appendix B-2)
- Transfer Stations
  - Roseburg, Glide, Reedsport, Canyonville, Myrtle Creek, Yoncalla, Glendale, camas Valley,
Elkton, and Tiller
- Landfill
  - Roseburg Landfill

Lane County (See Appendix B-3)
- Transfer Stations
  - Cottage Grove, Creswell, Florence, London, Low Pass, Mapleton, Marcola, McKenzie Bridge, Oakridge, Rattlesnake, Sharps Creek, Swisshome, Veneta, Vida, Walton
- Landfill
  - Short Mountain

Transfer Facilities

Coos, Douglas, and Lane county transfer stations have recycling facilities on the premises. A general list of permitted and non-permissible recyclables is listed in Chapter 4 table 4-1. Use Table 4-1 as a guide and please contact your local Transfer station to confirm if an item is recyclable (please see the Appendix listed above for phone or location information)

For more info on recycling in the five county Tribal service areas see Chapter 4 or see the url below

</tbody>
</table>

Compost Facilities

Currently composting is not available at transfer stations. Tribal government does not provide composting services for the government or housing facilities. For information about composting see Appendix D.

ILLEGAL DUMPING

People observing illegal dumping of waste (the action, the presence of improper materials in collection containers, or waste materials dumped in inappropriate locations) on the reservation’s property are to notify Tribal Police at 541-997-6011 or any of the Tribal Police Officers.

Actions for Cleanup

To successfully deal with illegal dumping problems, the CTCLSUI has implemented a limited approach for dealing with Cleanup that includes:

- Community Outreach
- Site Cleanup and Monitoring
Community Outreach

Educating tribal members, visitors, and the surrounding community members about how proper waste disposal will help limit future illegal dumping incidents. Tribal members are more likely to support waste management programs if they understand the new waste disposal options and the dangers of open and illegal dumping.

The following measures will be implemented by CTCLUSI to educate tribal members on new waste disposal options and the dangers of open and illegal dumping.

- Tribal Integrated Waste management Plan will be posted on the CTCLUSI website
- A flyer or pamphlet will be produced that reflects the Tribes views of waste management, illegal dumping and trash burning. The flyer or pamphlet will provide resources to Tribal members such as waste disposal sites and contact information for illegal dumping sightings. This material would be available at Tribal Offices and on the CTLCUSI website.
- Contact information regarding illegal dumping reporting will be available on the CTCLUSI website.

Site Cleanup and Monitoring

Site cleanup and monitoring includes planning, budgeting, and implementing monitoring and cleanup projects at current sites and monitoring of these sites for illegal dumping activity and efforts to prevent future illegal dumping. Proper planning is a key element in the success of monitoring and cleanup efforts. CTCLUSI will organize collaborative efforts between Maintenance, Natural Resources and Tribal Police departments to budget, plan and implement monitoring and cleanup activities.

Monitoring of cleaned up sites is crucial to eliminating the occurrence of illegal dumping. When funding permits, signs will be posted along with fencing, landscaping or other barriers to limit site access and discourage future dumping at the site. Standard adhesive backed “decals” warning of the prohibition against and the intent to prosecute unauthorized users could be made available if indirect funding is available.

Surveillance & Control Program

Once policies are in place for actions addressing illegal dumping, program enforcement and measurement are needed for evaluation of how policies are working.

Enforcement

The establishment of tribal codes, ordinances, and regulations related to proper disposal of waste materials are the foundation for enforcement actions against illegal dumping and set the stage for strong support from tribal council members. Beyond that, support is needed to remind tribal members, visitors, and the local community that illegal dumping is prohibited and Tribal Police are available if active illegal dumping is occurring.

CTCLSUI will implement the following enforcement measures as deterrents for illegal dumping.

- Tribal resolution that supports the Tribal Integrated Waste Management Plan
- Collaboration of the Natural Resources, Maintenance, an Police departments to implement and update the Tribal Integrated Waste Management Plan
- Development of outreach materials for Tribal members with background information and key points of contact
Program Measurement

Integral to any program is measurement of effectiveness. CTCLUSI will implement the following methods to measure the effectiveness of deterrents to illegal dumping.

- Record of illegal dumping activities
- Annually review accounts of illegal dumping

Resources

CTCLUSI will promote resources for hazardous waste disposal and community clean-up events.

- See Chapter 5
  - Example of community hazardous waste clean-up event: http://www.ci.florence.or.us/publicworks/household-hazardous-waste-roundWASTE

SYSTEMS NEEDS

Based on the review of the existing systems used by Tribal housing and Tribal government, and systems employed independently by Tribal membership, CTCLUSI has identified a potential waste management strategy designed to build upon the existing waste and recycling management systems and facilities. The needs are also based on the goals and objectives stated in Chapter 1 of this Plan, and how best to achieve these goals.

A key component of a strong Tribal Integrated Waste Management Program is utilizing a collection and disposal system that is compatible with the existing and future needs of the tribe.

An evaluation of the estimated annual operating costs for waste operations was prepared (see table next page).
## ESTIMATED ANNUAL OPERATING COSTS FOR WASTE MANAGEMENT FOR CTCLUSI

<table>
<thead>
<tr>
<th>Existing CTCLUSI Waste Management collection:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Administration &amp; Outreach</td>
<td>$ 9400 annual estimate&lt;sup&gt;2&lt;/sup&gt;</td>
</tr>
<tr>
<td>Housing</td>
<td>$ 9050 annual estimate&lt;sup&gt;3&lt;/sup&gt;</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>*Expansion of CTCLUSI Waste Management:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Collection events</td>
<td>$ 8000 annually&lt;sup&gt;4&lt;/sup&gt;</td>
</tr>
<tr>
<td>Natural Resource</td>
<td>$ 2000 annually&lt;sup&gt;5&lt;/sup&gt;</td>
</tr>
<tr>
<td>Maintenance</td>
<td>$ 2400 annually&lt;sup&gt;6&lt;/sup&gt;</td>
</tr>
<tr>
<td>Enforcement</td>
<td>$ 2000 annually&lt;sup&gt;7&lt;/sup&gt;</td>
</tr>
</tbody>
</table>

*Expansion of CTCLUSI Waste Management can be assessed based on availability funding through grants or the Tribal General Fund.

*Decisions about what materials to collect, as well as the costs and methods to collect, transport, and ultimately dispose of waste materials are all interrelated.*

<sup>4</sup> No collection events currently take place. Cost based on personal communication with Lane County Special Waste Dept 11/06/13 MC
<sup>5</sup> Estimate based on workload per month (7)
<sup>6</sup> Estimate based on workload per month (20)
<sup>7</sup> Estimate based on workload per month (7)
Chapter 4
Recycling
Recycling turns materials that would otherwise become waste back into valuable resources. Collection of recyclables is just the first step in a series of actions that generate a host of financial, environmental, and societal returns. There are several key benefits to recycling, including:

• Reduces emissions of many greenhouse gases and water pollutants.
• Conserves natural resources such as timber, water, and minerals.
• Saves energy, promotes efficiency and money spent on energy
• Stimulates the development of more environmentally friendly (greener) technologies.
• Reduces the need for new landfills and incinerators.
• Improves the quality of the environment and natural resources and is often associated with feelings of pride and accomplishment.
• Helps sustain the environment for future generations.

Recycling not only makes sense from an environmental and natural resource standpoint, but also makes good financial sense. Many products are can be made with less cost. For example, creating aluminum cans from recycled aluminum is far less energy-intensive, and less costly, than mining the raw materials and manufacturing new cans from scratch.

Recycling rates can be estimated by using the information on waste production and recycling in Chapter 2. Using this calculation, it can be estimated that the Tribes produce 405,993 pounds of recyclable materials. It is unknown what the ratio of these recyclable materials are added into the waste stream or if they are recycled.

Recycling facilities

_Tribal Government and Tribal Housing currently contract out waste/garbage services that include comingled and glass recycling. Counties and local garbage collections generally offer recycling of comingled recycling and glass; often oil recycling will also be offered. Typically recycling is offered at no additional collection cost and is free at transfer stations. By reducing volume of waste, recycling offers an effective way to reduce overall costs of waste disposal for individuals and business. Reducing waste aligns with the mission of the Tribes’ Department of Natural Resources to conserve, protect, and restore the natural resources of the Confederated Tribes’ Ancestral Territory._

IDENTIFICATION OF RECYCLABLE MATERIALS

Recyclable materials were identified and separated into three tiers using the following criteria:

**Tier 1:** Local Facilities were identified for all Tribal Service counties, materials are readily accepted, most recyclable materials fall into this category.

**Tier 2:** Materials that can be recycled, but for which there are limitations in the locations that may accept these materials or recycling may only be offered for a limited time. These materials may be dropped off or collected for recycling on an irregular basis, seasonally, at special events, or at selected locations as feasible or necessary.

**Tier 3:** Materials for which recycling may become feasible in the future. Although some facilities do exist in Oregon most do not regularly accept these items.

---

8 Curry county transfer stations have limited recycling
TIERED DESIGNATION OF RECYCLABLE MATERIALS

The identified list of materials by tier is presented below:

<table>
<thead>
<tr>
<th>TIER 1: READILY AVAILABLE</th>
<th>TIER 2: LIMITED RECYCLING</th>
<th>TIER 3: LIMITED RECYCLING AVAILABLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glass</td>

9 Comingled recycling is defined as recyclable plastics, metal cans, and low grade paper; see Chapter 2 definition.
**List of NON-recyclable items**

| paper | NO paper towels  
|       | NO paper plates  
|       | NO hard bound books |
| plastic | NO styrofoam  
|         | NO plastic take out containers  
|         | **NO plastic bags**  
|         | NO plastic cups, plates, utensils  
|         | NO bubble wrap  
|         | NO prescription vials  
|         | NO plastic trays (bakery, meat etc)  
|         | NO plastic lids  
|         | NO grocery "clamshells" like ones for berries or cherry tomatoes  
|         | NO plastic toxic containers (antifreeze, oil, syringe, etc) |
| glass | NO dishes  
|       | NO pyrex  
|       | NO light bulbs  
|       | NO mirrors  
|       | NO windows  
|       | NO drinking glasses |
| other | NO greasy metal  
|       | NO plastics with food residue  
|       | NO sharp metal  
|       | NO needles or syringes  
|       | NO metal toxic containers (antifreeze, oil, syringe, etc)  
|       | NO Hazardous materials |

**RECYCLING RECOMMENDATIONS**

Tribal members are encouraged to take recyclables to a transfer station or recycling center near their residence or business. CTCLUSI will promote recycling events taking place in Coos, Douglas and Lane counties on the CTCLUSI website and/or at Administration and Outreach offices. Please see Appendix and Chapter 3 Transfer facilities and Landfills for existing garbage and recycling facilities.

**COLLECTION**

Tribal Housing Residents are responsible for placing their recyclables at curbside for collection on their assigned days.

Tribal members living outside of Tribal housing must either take their recyclables with their other waste, to appropriate disposal facilities see Chapter 3 or inquire about recycling with their garbage collection provider. While some Tribal members live in remote areas with limited access to disposal or collection facilities, Tribal members are discouraged from burning because of potential health risks and environmental. Additionally
many items are not legal to burn in the state of Oregon\textsuperscript{10} or Tribal lands\textsuperscript{11}. Tribal members who continue or insist on burning illegal materials or off season are in violation of applicable laws and at risk for citation from local, state, or Tribal police

**RECYCLING GOALS**

The following goals have been adopted by CTCLUSI to enhance recycling.

- *Meet and improve recycling needs for the Tribal facilities, including housing*
- *Develop a waste hierarchy of waste reduction, recycling, composting, and disposal*
- *Develop outreach*

**Improving Recycling Programs**

CTCLUSI has determined that existing recycling programs could be improved by outreach to CTCLUSI Tribal members and Tribal Administration. This would increase the effectiveness of the overall waste management system and potentially reduce costs. The Natural Resources department will work with the Maintenance department and

**Outreach and Community Involvement**

For a recycling program to remain successful, the Natural Resource department must ensure continued awareness of the program including types of materials collected and proper methods to be used for recycling the various materials. Resources to aid in this approach include techniques such as flyers and brochures, workshops, print ads, and presentations. Further information on outreach and education can be found in Chapter 6.

**Program Monitoring**

The recycling coordinator will continually monitor the recycling program to identify any needs or deficiencies and obtain tribal council support to address and manage these areas. Methods the tribe will use for monitoring and evaluating the effectiveness of the recycling program are described below.

\textsuperscript{10} http://www.deq.state.or.us/aq/burning/openburning/openburn.asp
\textsuperscript{11} No Tribal Code currently exists for this (11/30/13 MC)
Chapter 5
Special Wastes
SPECIAL WASTES

Wastes that require special handling or consideration when it enters the waste management system are labeled special waste. These wastes may include, but are not limited to:

- Hazardous Waste (HW)
- Construction and Demolition (C&D) Debris
- Electronic Wastes (E-Waste)
- Tires
- Asbestos Wastes
- Vehicle Fluids
- Petroleum Contaminated Soil
- Medical/Infectious Wastes
- Veterinary Wastes
- Liquid Wastes

As a beginning point for this Tribal Integrated Waste Program, only some of the Special wastes listed above will be addressed in this Chapter.

HOUSEHOLD HAZARDOUS WASTE

Examples of Household Hazardous waste:

- **Cleaning Products**: Oven cleaners; drain cleaners; wood and metal cleaners and polishers; toilet cleaners; tub, tile and shower cleaners; bleach; pool/hot tub chemicals
- **Indoor Pesticides**: Flea repellants and shampoos; ant sprays and baits; bug sprays; moth repellents; mouse and rat poisons and bait; houseplant insecticides; cockroach spreads and baits
- **Automotive products**: Motor oil; fuel additives; carburetor and fuel injection cleaners; engine coolant (antifreeze); starter fluids; automotive batteries; transmission and brake fluid; air conditioning refrigerants
- **Workshop/Painting supplies**: Adhesives and glues; furniture/paint strippers; stains and finishes; paint thinners and turpentine; oil or enamel based paint; photographic chemicals; fixatives and other solvents
- **Lawn and Garden Products**: herbicides, insecticides, fungicides/wood preservatives
- **Miscellaneous Flammable Products**: Propane tanks and other compressed gas; gas cylinders; kerosene; home heating oil; diesel fuel; gas/oil mix; lighter fluid
- **Miscellaneous**: Batteries (non-rechargeable lithium ion); mercury thermostats or thermometers; fluorescent light bulbs; florescent

**HHW can harm the environment and human health if it is not properly handled and disposed.**

- **Product Use** – Some pesticides, when used improperly (for example, at high application rates), may enter surface waters and kill aquatic life and contaminate drinking water
- **Product Storage** – Improperly stored products can result in accidental poisonings of children and animals. Similarly, storage of flammable products (solvents, fuels, oil-based paint) in homes may start fires, add to the fuel load of buildings, and endanger firefighter safety
- **Waste Handling** – There have been several reported incidents at waste facilities where collection workers have been injured or endangered as a result of hazardous waste disposal from households. For example, some pool chemicals are highly reactive and can release a poisonous gas. Alternatively, flammable products may ignite inside the collection vehicle or disposal facility.

- **Product Disposal** – Many hazardous products, unless segregated and collected separately from other wastes, can damage the environment, including contamination of soil and water, and pollution of air. Environmental damage can occur in several ways, including direct releases to the environment (dumping outside), releases from disposal sites (landfills and incinerators), and releases from wastewater treatment facilities. Used oil dumped on the ground, automotive batteries thrown in a roadside ditch, and herbicides dumped down the storm drain are all examples of direct releases that may harm the environment. Even disposal of some types of HHW in lined landfills can result in environmental damage. For example, mercury disposed of with regular garbage will eventually leach out of the landfill. If collected, the leachate is typically treated on-site or sent to a wastewater treatment facility. In either case, the mercury is eventually released back into the environment.

**Existing Programs**

Household Hazardous Waste (HHW) collection programs ensure hazardous materials are properly handled and sent to facilities designed to treat or dispose of hazardous waste. CTCLUSI does not currently have a HHW collection program. Although, counties throughout Oregon do hold periodic events throughout the year or provide curbside collection for some HHW products like motor oil or batteries. Tribal members and Tribal Administration is encouraged to contact county special or hazardous waste departments to inquire about programs. Tribal Administration will work with counties to get the word out about collection events and post materials on the CTCLUSI website.

**Contracted Services and Agreements**

Many tribes choose to use private contractors for HHW disposal. Contractors hired to manage an HHW collection program are trained in hazardous waste handling and manifesting requirements, and can be available on an as-needed basis. This can be an ideal solution for reservations with periodic collection events which do not require full time staff to manage the program on a year round basis.

**Program Development**

A goal of the CTCLUSI Tribal Integrated Waste Plan is to minimize environmental and health impacts associated with HHW. Efforts will be directed at educating Tribal members and Tribal Administration about the potential hazards of household products, as well as proper handling and disposal methods.
CONSTRUCTION AND DEMOLITION WASTE

Construction and demolition (C&D) debris is generated by the construction, demolition, and renovation of existing structures, clearing of land, removal or construction of roads and utilities, and other activities that produce bulky wastes. General characteristics, regulatory requirements, landfilling options, and recycling opportunities for C&D debris differ from those for MSW, and therefore, should be managed differently.

Some C&D debris may be classified as hazardous waste because it contains hazardous materials, such as lead or chromium, or has been contaminated by other hazardous waste. Hazardous C&D debris must be disposed of in a hazardous waste landfill. Other toxic materials, such as asbestos and polychlorinated biphenyls (PCBs), must also be managed in accordance with federal regulations, as spelled out by the Toxic Substances Control Act (TSCA).

C&D Existing Practices

C&D debris is generated from a variety of construction and demolition activities. Sources and representative composition are discussed in this subsection. Depending on the type and amount of activities occurring on a reservation, the amount of C&D debris generated can vary greatly.

Factors affecting quantities of debris generated, collected, and disposed of include the type of construction (i.e., office buildings, recreational facilities, and housing) and the type of project (i.e., new construction, remodeling, renovation, road repair).

CTCLUSI has had a variety of construction projects that have taken place on Tribal lands over the past decade. A few examples of past and current projects are: building a casino and hotel, renovations to Tribal Administration and Outreach offices, renovations of a golf course, and acquisition and clean-up of a government surplus property at Coos Head. CTCLUSI uses private contractors for the disposal of C&D debris. Tribal members and contractors must transport all C&D debris off Tribal lands for disposal at county transfer stations and landfills.

*Surveillance and management of contracted services is crucial to confirming proper waste disposal.*

Program Development

The major potential benefits of C&D debris recycling are to reduce the cost of materials used in construction and to reduce the volume and cost of disposal of waste materials. Other benefits that can be gained through waste management include a more accurate prediction of waste generation rates for building projects, increased revenue from the sale of the recovered materials, and the conservation of valuable natural resources.

CTCLUSI has selected the following options for future considerations and/or implementation:

- **Development of C&D materials disposal methods for contracted services**
  - Inclusion of methods in Request for Proposals for construction, renovation, or demolition activities contracted by the Tribes
  - Surveillance of contracted disposal services

- **Development of materials recovery approach that reduces the creation of C&D waste and subsequent costs**
SCRAP TIRES

Scrap tires are generated from passenger cars, trucks, or farm equipment when tires are changed because they are worn or damaged. Often scrap tires are accumulated by commercial businesses that sell or change tires. Scrap tire piles are not treated as hazardous waste.

A tire’s physical structure, durability, and heat-retaining characteristics make tire stockpiles a potential threat to human health and the environment. The curved shape of a tire allows rainwater to collect and creates an ideal habitat for disease carrying pests such as rodents and mosquitoes. Prone to heat retention, tires in stockpiles also can ignite, creating fires that are difficult to extinguish and can burn for months, generating unhealthy smoke and toxic oils. Illegal tire dumping pollutes ravines, woods, deserts, and empty lots. However, once a tire fire occurs, tires break down into hazardous compounds including gases, heavy metals, and oil, which may then trigger other cleanup requirements.

Tire Existing Practices

CTCLUSI does not have an existing Tire recycling program. CTCLUSI encourages proper tire disposal. Proper disposal occurs when the new tires are put on a vehicle (and old tires are taken by the company selling new tires); Tribal and community members can often drop off a limited numbers of tires at transfer stations or recycling centers. Tribal members are encouraged to call their county Special Waste department to inquire about tire collection days (which may coincide with HHW collection).

Contracted Services and Agreements

CTCLUSI may choose to use a private contractors for scrap tire disposal. Contractors hired to manage scrap tires collection and disposals are trained in hazardous waste handling and manifesting requirements, and can be available on an as needed basis.

Program Development

- CTCLUSI will manage surveillance of contracted services for scrap tire disposal.
- CTCLUSI may look to state or federal scrap tire programs for financial assistance to fund clean-up on Tribal Lands or hold scrap tire collection events.
- There are a variety of uses for scrap tires instead of disposal. Scrap tires may be recycled and produce products such as floor mats, boat bumpers, agricultural and horticultural applications, sports and playing fields and tracks, playgrounds, to name a few. CTCLUSI will consider and encourage recycling when managing the disposal of scrap tires.
Chapter 6

Waste Reduction Outreach and Public Education
WASTE REDUCTION

Waste reduction includes both waste prevention and reuse. Recycling is also a form of waste reduction. The following figure highlights preferred ways to manage waste, reduce environmental degradation due to waste, and manage costs.

Source reduction is defined as the practice of designing, manufacturing, purchasing, or using materials in an effort to reduce waste volume or toxicity. Source reduction approaches waste reduction by addressing the origins of waste generation. Producing a new product requires materials (raw or processed) and energy (through extraction, processing or transport of the materials or product). Consequently, reduction and reuse of products have been recognized as effective ways to conserve natural resources, protect the environment, and save money.

Reuse is defined as using objects or materials over again, or finding new uses for them so they are not thrown away. Reusing items reduces waste at the points of use because it delays or avoids their entry into the waste collection and disposal system. Examples of reuse include crushing broken-up concrete and using it as an aggregate for road base and reusing empty food jars to store food, nails, buttons, etc.

*CTCLUSI recognizes that the most effective way to reduce waste is to not create it in the first place.*

SOURCE REDUCTION

To have a successful source reduction program, Tribal employees and Tribal members need to be trained in source reduction and promotion of reduction methods needs to take place. Practicing source reduction can achieve cost savings through reduced purchasing costs and lower waste collection, transportation, processing, and disposal costs.
• CTCLUSI does not currently implement any source reduction strategies.
• CTCLUSI will work to develop goals and integrate source reduction strategies.
• When developed, waste reduction goals and strategies\(^{12}\) will be included in the Tribal Integrated Waste Management Plan and if applicable the Employee Handbook.
• CTCLUSI will work to promote waste reduction through outreach and education.

**REUSE**

*Reuse is preferred to recycling because the materials do not need to be reprocessed before they can be used again.* Items normally discarded as waste—such as appliances, furniture, office supplies, clothing—can be reused as originally intended or as used products. Reuse is a good alternative to disposal for materials for which recycling facilities are located too far away.

• CTCLUSI maintains a formal reuse program whereby used sheets and towels and sometimes furniture, from the Tribes’ casino, are available to Tribal members without cost.
• CTCLUSI has not established a budget for public education and outreach materials to waste management, recycling or waste reduction.
• CTCLUSI will work to promote reuse of items through outreach and education\(^ {13} \)

**RECOMMENDATIONS**

To improve waste management and to increase recycling, reuse, and source reduction, the Natural Resource Department along with the Tribal Administration will work to develop and implement waste management practices and improve outreach, education, and training regarding proper waste disposal methods. Waste reduction methods and benefits will be evaluated when time and funding permits. CTCLUSI may explore funding opportunities to implement or expand waste management services.

\(^{12}\) Examples of source reduction and reuse strategies are available in the TSWAN Integrated Solid Waste Management template.

\(^{13}\) Examples of education and outreach methods are available in the TSWAN Integrated Solid Waste Management template.
Chapter 7

Implementation
IMPLEMENTATION OF THE TRIBAL INTEGRATED WASTE MANAGEMENT PLAN

Tribal Administration and Natural Resource Department will work together to manage and implement good Tribal waste practices outlined in the Tribal Integrated Waste Plan. When applicable Tribal Police may be another source of management and implementation of the Tribal Integrated Waste Plan. Tribal Council will work with Tribal Administration, Natural Resource Department, and Tribal Police to ensure that practices improve and maintain the quality of land, air, water, and cultural resources in the Tribes’ Ancestral Territory for future generations. This plan includes the identification of existing waste systems and waste reduction strategies, implementation, monitoring and outreach methods.

Tribal Personnel & Responsibilities

The roles and responsibilities of waste management are diverse and complex, will continue to grow and adapt as the Tribal Integrated Waste Management Plan develops and grow.

- **Tribal Administration**
  - Budgeting- anticipates revenues/losses from disposal fees and grant funds
  - Website resources- provides IT assistance for posting information on CTCLUSI website

- **Natural Resources Department**
  - Operation—develops, manages, and monitors Tribal Integrated Waste Management Plan
  - Produces and updates outreach material
  - Provides and updates resources for waste management to post on the CTCLUSI website

- **Tribal Police**
  - Enforcement and investigation of issues related to illegal dumping on Tribal lands
  - Resource for Tribal members to contact regarding inappropriate waste disposal, illegal burning activities, and pharmaceutical disposal.

Needs

To expand and grow waste management it may be necessary to seek out funding to assist personnel costs or provide additional services.

FINANCIAL OBLIGATIONS AND FUNDING

The major costs associated with managing waste include¹⁴:

- Program planning
- Facility design and construction
- Equipment purchases
- Cleanup
- Operation and maintenance
- Personnel training and administration
- Landfill closure and post-closure care

¹⁴ USEPA Tribal Decision-Maker’s Guide to Solid Waste Management
Program Planning

Funding is needed to assist with implementation of the Tribal Integrated Waste Management Plan. Initial implementation costs include: wages for staff associated with waste management; production of outreach material; contracting services for waste collection or disposal to name a few.

Funding Assistance

There are two primary sources of funding for implementation of waste management through the Tribal Integrated Waste Management Plan.

- *Indirect or tribal general funds*
- *Grants or loans from state or federal agencies (or private organizations that provide grants to Indian tribes for waste and other environmental programs).*\(^{15}\) See Appendix

CTCLUSI should speak directly with regional agency representatives from EPA, HIS, BIA, USDA, and HUD to inquire and secure funding for waste management projects. In many cases, talking with other tribes may provide additional resources for implementation of the Tribal Waste management Plan or expansion of current waste management techniques.

---

\(^{15}\) See the USEPA’s, Office of Solid Waste and Emergency Response document: Grant Resources for Solid Waste Activity in Indian Country,
Acknowledgements:

This Tribal Integrate Waste Management Plan was adapted from a template developed by the Tribal Solid Waste Advisory Network (TSWAN) to suit the current needs of CTCLUSI. As TSWAN members, CTCLUSI is grateful for the resources, training and guidance that TSWAN has and continues to provide for CTCLUSI.
Appendix A

Federal Guidance Documents Relating to Waste Management Issues for Tribes
United States Environmental Protection Agency (EPA)

The EPA is entrusted with the responsibility to protect human health and the environment. Working on a government-to-government basis with tribes, the EPA gives special considerations to Tribal interests in making Agency policy, and to insure the close involvement of Tribal Governments in making decisions and managing environmental programs affecting reservation lands. In 1984, EPA became the first federal agency to adopt a formal Indian Policy of working with federally recognized tribes on a government-to-government basis. This policy is intended to provide guidance to EPA staff and managers in dealing with Tribal governments and in responding to the problems of environmental management on Indian reservations in order to protect Tribal health and environments. For further information, go to the website: http://www.epa.gov/indian/programs.htm

American Indian Environmental Office (AIEO)

The AIEO coordinates an Agency-wide effort to strengthen public health and environmental protection in Indian Country. AIEO oversees development and implementation of the Agency’s Indian Policy and ensures that the agency-wide implementation of its Indian Program is consistent with the Administration’s policy to work with tribes on a government-to-government basis to protect Tribal health and environments. For further information, go to the website: http://www.epa.gov/indian

Bureau of Indian Affairs (BIA)

The BIA is responsible for the administration and management of 55.7 million acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 562 federal recognized Tribes in the United States. Developing forestlands, leasing assets on these lands, directing agricultural programs, protecting water and land rights, developing and maintaining infrastructure and economic development are all part of the agency’s responsibility. For further information, go to the website: http://www.doi.gov/bureau-indian-affairs.html.

Indian Health Services (IHS)

An agency within the Department of Health and Human Services, the IHS is responsible for providing federal health services to American Indians and Alaska Natives. The IHS is the principal federal health care provider and health advocate for Indian people, and its goal is to raise their health status to the highest possible level. The Sanitation Facilities Construction Program (SFC) within the IHS, provides assistance for the cooperative development and continued operation of safe water, wastewater, and solid waste systems, and related support facilities for American Indian and Alaska Native homes and communities. For further information, go to the website: http://www.ihs.gov.

1 "Federal recognition" means these Tribes have a special legal relationship with the United States government—a government-to-government relationship.
<table>
<thead>
<tr>
<th>GUIDANCE DOCUMENT</th>
<th>DESCRIPTION OF DOCUMENT</th>
<th>AFFECTS TO TRIBES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Federal Laws</td>
<td>Federal Laws can be found on the following website: <a href="http://www.epa.gov">http://www.epa.gov</a>; click on Laws and Regulations; and click on Major Environmental Laws.</td>
<td>RCRA applies to all Tribal reservations, including ones with established landfills on-site. Tribes may also be held liable for RCRA violations for hazardous waste sites on reservation lands.</td>
</tr>
</tbody>
</table>
| Resource Conservation and Recovery Act (RCRA) | Enacted in 1976, RCRA is the primary federal law governing solid waste.  
• RCRA addresses the issue of managing and disposing of municipal and industrial waste nationwide.  
• RCRA establishes federal programs to regulate and manage treatment, storage, transport, and disposal of non-hazardous solid waste and hazardous waste.  
• Municipal solid waste (MSW) is regulated under Subtitle D of RCRA by technical standards for solid waste management facilities. | Owners/operators of landfills on Tribal reservations can request design and operating flexibility in states with EPA-approved MSWLF permitting programs. |
| Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) | Congress enacted CERCLA, also known as the Superfund Law, in 1980. CERCLA provides a broad federal authority to respond directly to releases or threatened releases of hazardous substances that may endanger public health or the environment.  
• CERCLA establishes a ban on and select requirements concerning closed and abandoned hazardous waste sites, provides for liability of persons responsible for releases of hazardous waste at these sites, and establishes a trust fund to provide for cleanup when no responsible party can be identified. | Tribal lands that have illegal dumping and hazardous materials disposed of in their municipal solid waste stream can be subject to potential CERCLA risks. |

Waste management practices that directly or indirectly impact groundwater, surface water, and air resources on Tribal lands also can be subject to federal regulatory requirements. In addition to a tribe’s inherent regulatory authority, certain federal regulatory programs, including the Clean Water Act, the Clean Air Act, and the Safe Drinking Water Act also are applicable to tribes.
### Clean Water Act (CWA)

The CWA establishes the basic structure for regulating discharges of pollutants into the waters of the United States.

- It gives EPA the authority to implement pollution control programs such as setting wastewater standards for industry, and has requirements to set water quality standards for all contaminants in surface waters.
- The CWA makes it unlawful for any person to discharge any pollutant from a point source into navigable waters, unless a permit was obtained under its provisions.

To obtain "treatment as state" (TAS) status under the CWA, a tribe must meet criteria reflecting its ability to effectively implement the program.

### Clean Air Act (CAA)

- The CAA gives authority to the EPA for setting limits on how much of a pollutant can be in the air anywhere in the United States. This ensures that all Americans have the same basic health and environmental protections.
- The law allows individual states to have stronger pollution controls, and take the lead in carrying out the CAA, because pollution control problems often require special understanding of local industries, geography, housing patterns, etc.

Tribes had limited powers under the CAA. The EPA allows tribes to regulate indirect emissions from sources near the reservation. Tribes having landfills should be concerned with methane emissions.

### Safe Drinking Water Act (SDWA)

Congress originally passed the SDWA in 1974 to protect public health by regulating the nation’s public drinking water supply.

- Amended in 1986 and 1996 and requires many actions to protect drinking water and its sources: rivers, lakes, reservoirs, springs, and ground water wells.

Tribes may be treated as states by the EPA to delegate certain program authority if a tribe demonstrates its ability to administer a program effectively.

### Federal Regulations

Federal Regulations can be found at: [http://www.epa.gov](http://www.epa.gov); select “Laws, Regulations & Dockets” and then select “Code of Federal Regulations”.

### 40 CFR 243: Guidelines for the Storage & Collection of Residential, Commercial, & Institutional Solid Waste

Applicable to the collection of residential, commercial, and institutional solid wastes and street wastes.

- Recommended for state, interstate, regional, and local governments for use in their activities.
- Outline minimum levels of performance required of solid waste collection operations, including solid waste collection containers, types of collection vehicles and associated safety precautions, and frequency of collection to inhibit the propagation or attraction of vectors and the creation of nuisances.

Tribes should follow guidelines for the storage of solid wastes to avoid health concerns created by animals and unsanitary conditions.
- Establishes standards for determining whether solid waste disposal facilities and practices may pose adverse effects on human health and the environment.  
- Governs only those solid waste disposal facilities that do not meet the definition of a MSWLF. | Tribal facilities failing to satisfy either the criteria in CFR 257 are considered “open dumps”, which are prohibited under Section 4005 of the RCRA. |
| --- | --- | --- |
| **40 CFR 258**: Criteria for Municipal Solid Waste Landfills | Establishes minimum national criteria under RCRA for protecting human health and the environment, while allowing states/tribes to develop more flexible MSWLF criteria.  
- Applies to owners and operators of new MSWLF units, existing MSWLF units, and lateral expansions, except otherwise noted. | Indian tribes can maintain lead roles in implementing and enforcing the revised MSWLF criteria through approved state/Tribal permit programs. |
| **40 CFR Parts 260-271**: Hazardous Waste Management Guidelines | Subparts D and E exempt certain landfills (Exemptions for Small Landfills) if they meet the following criteria. To qualify, a landfill must:  
- Receives less than 20 tons of waste per day (averaged yearly), receive less than 25 inches of rainfall per year, and have no other practical waste disposal alternative.  
- Have no evidence of ground-water contamination from the landfill.  
- Be considered an extremely remote community that has no ready access to other disposal sites for an extended period of time | In addition to RCRA violations, tribes may also be held liable for 40 CFR Parts 260-271 violations for hazardous waste sites and storage on reservation lands. |
|  | Sets forth rules and identifies solid wastes which are subject to regulation as hazardous wastes and which are subject to the notification requirements in RCRA. Parts 260-271 sets guidelines for:  
- Defines criteria for identifying the characteristics of hazardous waste.  
- Provides a listing of hazardous wastes.  
- Establishes standards for generators and persons transporting hazardous wastes.  
- Establishes minimum national standards for acceptable management practices for owners and operators of all facilities that treat, store, or dispose of hazardous waste. |  |
| **FEDERAL GUIDANCE DOCUMENTS RELATING TO SOLID WASTE MANAGEMENT ISSUES FOR TRIBES** |
|-------------------------------------------------|-------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
- Reduces the regulatory management requirements  
- Fosters environmentally sound recycling or disposal practices of these select wastes commonly generated as hazardous wastes. | Tribes generating universal wastes should comply with storage requirements, but may recycle the materials instead of disposing. |
| **40 CFR Part 279: Standards for the Management of Used Oil** | Establishes standards for the generation, transportation, reuse, recycling, and disposal of used oil. | Tribes generating used oil should comply with storage requirements, but may recycle the materials instead of disposing. |
| **Other Legislation** | | |
| **Public Law 103-399: (The Indian Lands Open Dump Clean Up Act) October 22, 1994** | Identifies the location of open dumps on Indian lands.  
- Assesses the relative health and environment hazards posed by those sites  
- Provides financial and technical assistance to Indian Tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities. | For further information, go to: [http://www.ihs.gov](http://www.ihs.gov) |
| **Executive Order 13175: Consultation and Coordination With Indian Tribal Governments, November 9, 2000** | Executive Order (EO) 13175 establishes a working relationship with Indian Tribal governments for the development of regulatory practices on Federal matters that have great impact on their communities.  
- Reduces the burden of unfunded mandates upon Indian Tribal governments and simplifies the process for waivers to Indian Tribal governments. | For further information, go to: [http://www.epa.gov/fedrgstr/eo/eo13175.htm](http://www.epa.gov/fedrgstr/eo/eo13175.htm). |
Appendix C

Examples of Waste Prevention Practices
Waste Reduction & Reuse

Reduce What You Use — Waste Reduction is the number one priority in the solid waste industry. It is better and less expensive to not generate the waste in the first place than to have to recycle or dispose of it afterwards. Following is information and some resources available to help you reduce the amount of waste you create.

Every year, the average American buys 440 pounds of packaging, and then just throws it away. Buy products with less packaging (like bulk items, larger sizes, and concentrated liquids) and fill smaller, reusable containers.

Stop Junk Mail — Almost half of all junk mail is never opened. The average household receives 675 pieces of junk mail a year. Even if you recycle it all, there are still enormous environmental costs in the terms of ink, energy to produce, and deliver and recycle the paper. If you want to stop you name from being sold to large mailing list companies, write to the following companies:

Mail Preference Service
Direct Marketing Association
PO Box 9008
Farmingdale, NY 11735-9008

Hill-Donnelly Marketing
PO Box 14417
Tampa, FL 33690

MetroMail Corporation
901 West Bond
Lincoln, NE 78521

Reuse manila envelopes, shipping boxes, packaging “peanuts” and bubble wrap.

Borrow or Rent: Do you really need to own something you hardly ever use? Ask a friend or look in the Yellow Pages under Rentals. Also, contact your Coos County libraries for books, magazines, audio and video tapes.

Re-Bag: It is simply less wasteful to reuse grocery bags than to get a new one with each store you visit. Think about how many bags you use and how briefly each is actually in use. Save paper and plastic bags and bring with you to the market each time you go.
shopping. Also you can invest in cloth or plastic shopping bags that are made specifically for reuse.

**Computer & Office:** Proof read documents on the computer screen before printing, recharge printer cartridges, print double sided and in draft mode whenever possible to reduce paper and ink usage

**Landscaping:** Choose a landscape design that needs low maintenance and little water. Grass cycling – use a mulching mower which leaves grass clippings to naturally decompose. Grass clippings no longer need to be bagged and hauled away. Compost grass clippings and leaves into a valuable soil amendment or make sure you landscape contractor composts. Use a worm bin to convert non-fatty food wastes into high quality potting soil.

Instead of paper, use cloth towels, tablecloths and napkins

Give old magazines to libraries, hospitals, clinics or nursing homes

Turn used lumber into birdhouses, mailboxes, compost bins and other woodworking projects

In addition to reducing the amount of materials in the solid waste stream, reducing waste toxicity is another important component of source reduction. Some jobs around the home may require the use of products containing hazardous components. Nevertheless, toxicity reduction can be achieved by following some simple guidelines. Take actions that use nonhazardous or less hazardous components to accomplish the task at hand. Instead of using pesticides, for example, plant marigolds in your garden to ward off certain pests. In some cases, you may be using less toxic chemicals to do a job and in others you may use some physical method, such as sandpaper, scouring pads, or just a little more elbow grease, to achieve the same results.
Waste Prevention

Want to trash less?
It’s as easy as Reduce, Reuse and Recycle!

Reduce What You Use

Don’t Buy Trash
Every year, the average American buys 440 pounds of packaging...then just throws it away! Buy products with less packaging (like bulk items, larger sizes and concentrated liquids) and fill smaller, reusable containers.

Think Local First
Buying local goods is almost always a waste saver.

Stop Junk Mail
Almost half of all junk mail is never even opened! If you want to stop your name from being sold to large mailing list companies, contact the following companies:

Mail Preference Service or Direct Marketing Association

MetroMail Corporation
List Maintenance
901 West Bond
Lincoln, Nebraska  68521

ADVO A major direct mailer will remove your name from their lists. Fill out the form and mail it to them.

To stop receiving credit card offers in the mail; call 1-888-5 OPT OUT (1-888-567-8688)
One call reaches these agencies: Equifax, Trans Union, Experian, and Innovis

To reduce unwanted catalog mailings; send full name, including middle initial, and your current address to:

Abacus
PO Box 1478
Broomfield, CO  80038
- or -
email: optout@abacus-direct.com

Businesses looking to reduce their unwanted mail can find helpful steps at the National Waste Prevention Coalition and StopJunkMail.org.
Borrow Or Rent
Do you really need to own something you hardly ever use? Ask a friend, or look in the Yellow Pages under Rentals. And don’t forget Douglas County’s great libraries for books, magazines, audio and video tapes.

Use Both Sides
Why trash (or even recycle) a piece of paper if only one side’s been used? The flip side is perfect for scrap paper.

Bag And Re-bag
The best grocery bags are reusable ones you bring with you. Some stores even give you a discount of $.02-.05 per reused bag.

Choose Recycled
Products and packaging too. More post-consumer content means fewer raw materials were used and more energy was saved. But look closely. Products labeled as "recyclable" aren’t necessarily recycled.

Get Into The Trash-less Habit
Start small. (Every little bit helps and you can build from there.) Share handy hints with others. Think before you toss.

Reuse What You Can

Pass It On
Used doesn't mean useless. Call your Douglas County Waste Manager for a list of folks who can give your old computer or plastic packaging & peanuts new life.

Have something you think someone else can use? Check out our Materials Exchange.

Use Your Imagination
Before you recycle or trash something, think… "Can I use it again for the same thing or maybe for something else?"

Make It Last
Maintain and repair products instead of replacing them. Newer isn't necessarily better.

Charge It
Americans buy and trash 2 billion batteries a year. The solution? No, not pink bunnies. Rechargeables!
**Refill It**
Choose reuseables over disposables. And reuse disposables if you can. Companies can reload single-use cameras and printer cartridges and they're cheaper.

**Stuff It**
Used jars, tubs, buckets, cans and bags make great containers. And, used cardboard boxes and plastic peanuts are ready-made for your own shipments.

**Give It Away**
Your "trash" could be someone else's treasure, Donate used books, clothing, furniture, house wares, hardware, bikes and appliances. Or, have a yard sale!

**Rip It Up**
If your used clothes are too worn to give away, tear them up for rags. And use other scrap materials for crafts and kid's projects.

**Used Building Materials**
The sites listed below will accept and sell used building materials

**Get Old**
When a used product will do, why buy new? Buy USED and save money$$ at . .

**HEARTWOOD ReSources**
3490 Highway 99 South,
Roseburg
541-679-1777
Open Tuesdays through Saturdays

Accepts and sells most building materials in retail warehouse location. Donations of materials are tax-deductible. Proceeds go to **Umpqua Community Development Corporation's** first-time, low-income home buyer program. They also offer deconstruction services.

**Other Waste Prevention Links**
- [DEQ Waste Reduction Strategies](#)
- [Yellow Pages Opt Out](#)

- [Rechargeable Battery and Cellphone Recycling Locations](#)
- [Wheels For Wishes](#)
- [Materials Management in Oregon](#)

And when you've **Reduced and Reused** as much as you can, it's finally time to.... **Use your RECYCLE POWER!**
Less is Best—Reducing and Reusing

Recycling is great, but reducing and reusing saves more natural resources and avoids more pollution—better yet, it can save you money! Currently Lane County citizens are recycling 53% of all waste. That’s great! But on average, each of us uses DOUBLE the resources we used just 15 years ago. Recycling makes a difference but reducing, reusing, and rethinking our need for convenience packaging will be necessary to build a healthy future for our children.

Want to save money?

Just look in the garbage can! Disposable cleaning wipes, single serve packaging and other disposable products not only cost you two or three times more at the grocery store, they unnecessarily use up resources that our future children and grandchildren need.

You’ll find tips on waste prevention as well as a full guide to disposal options in Lane County. Look up front in the DEX phone book Brown Pages. Visit www.lanecounty.org/lessisbest for great tips and resources for preventing waste and saving money.
Waste Prevention Tips

Before you buy a product, ask yourself:
• Do I really need this?
• Can I find this at a thrift store or second-hand store?
• Is this a durable and/or repairable item?
• Does this contain recycled materials?
• Is there an alternative that uses less packaging?

Before you toss it out, ask yourself:
• Can this be repaired, reused, or recycled? For a list of local resources, visit Repair2ReUse.org
• Do I know anybody who can use this?
• What about listing this on www.freecycle.org or one of the other many community sharing sites?

More Waste Prevention Tips:
• Use rechargeable batteries.
• Use refillable pens, water bottles, lighters, and razors, not disposables.
• Purchase products with post-consumer recycled content.
• Buy in bulk whenever possible.
• Bring your own reusable bag to the store and cup to the coffee shop.
• Request “no bag please,” if buying only a few items.
• Donate used items to thrift organizations.
• Shop at garage sales and thrift stores.

Stop Unwanted Junk Mail
• Register with Direct Marketing Association’s Mail Preferences Service at www.dmachoice.org, or Direct Mail at www.directmail.com/directory/mail_preference.
• Catalog Choice at www.catalogchoice.org, is a free and easy way to remove yourself from unwanted catalog lists.
• Call the catalog’s toll-free customer service number and ask that your name be removed from their mailing list.
• Stop receiving pre-screened credit card offers, visit www.optoutprescreen.com or call 1-888-5OPTOUT (1-888-567-8688).
• Don’t fill out product warranty cards. They are often used to collect personal information. Manufacturers should honor warranties even if you don’t fill out and return the registration cards. Be sure to save your sales receipt.
• Request that your name not be sold, rented, or given away when you make a donation, order a product or service, or subscribe to a publication.
• Avoid Sweepstakes and contests if you don’t want the mail. Entry forms are usually “fishing expeditions” for names to add to direct mail lists.

Appendix D

Composting Guides
Composting

Do something good for the earth. Put yard and food waste back where it belongs.

How Does Composting Work?
Thanks to simple decomposition, nature "recycles" plant wastes into a rich soil additive called compost. It is a dark, crumbly soil-like material that can be used as a mulch, top dressing or soil amendment. Like good cooking, composting is part science, part art. Even the first-time composter can make good quality compost. Without getting too technical, here's a review of what's involved.

Materials
Anything that was once alive will naturally decompose. However, some organic wastes should not be composted at home:

<table>

</tr>
<tr>
<td>Tea bags</td>
<td></td>
</tr>
</tbody>
</table>

Biology
Bacteria start the process of decaying organic matter. They are the first to break down plant tissue and also the most numerous and effective composters. Fungi and protozoans soon join the bacteria and, somewhat later in the cycle, centipedes, millipedes, beetles, and worms finish what the bacteria started.

Surface Area
If the microbes have more surface areas to feed on, the materials will break down faster. It's like a block of ice in the sun...slow to break down when it's large, but break into smaller pieces and it melts quickly. Chopping your garden debris with a machete, or using a chipper/shredded or lawnmower to shred materials will help them decompose faster.

Time & Temperature
The most efficient decomposing bacteria thrive in temperatures between 110 and 160 degrees F. Thus, the hotter the pile, the faster the decomposing. If you achieve a good balance of carbon and nitrogen, provide lots of surface area within a large volume of material, and maintain adequate moisture and aeration, the temperature will rise over several days.
Composting

**Volume**
A large compost pile will insulate itself, trapping the heat generated by microbial activity. A 3’ by 3’ by 3’ pile (1 cubic yard) is considered minimum size for hot, fast composting. Piles wider or taller than 5 feet don’t allow enough air to reach the microbes at the center.

**Moisture & Aeration**
Most life on earth needs a certain amount of water and air to survive. The microbes in the compost pile function best where the materials are as damp as a wrung out sponge and have many air passages. Extremes of sun or rain can adversely affect the balance of air and moisture in your pile. The air in the pile is usually used up faster than the moisture, so the materials must be "turned" or mixed up occasionally to add air that will sustain high temperatures and control odor.

All organic materials contain carbon and nitrogen in varying ratios (C:N). Carbon in brown leaves and woody wastes provides energy, while nitrogen in green grass and vegetable scraps provides protein for cell development. A C:N ration of 30:1 is considered ideal for composting. This balance can be achieved by mixing roughly two parts grass clippings (C:N=2:1) with one part brown leaves (C:N=60:1). Making layers of green and brown materials can be useful in arriving at these proportions, but a complete mixing of ingredients is preferable for composting. Though a C:N ration of 30:1 is ideal for hot, fast composting, higher ratios (with more carbon materials) will work adequately for slower composting.
Recycler’s Guide to Basic Composting

Why Compost?
Composting is nature’s way of recycling. It is a satisfying way to turn your fruit, vegetable and yard trimmings into a dark, crumbly, sweet-smelling soil conditioner.

Composting:
- Saves you money by lowering garbage bills and replacing store-bought soil conditioners.
- Helps garden and house plants by improving the fertility and health of your soil.
- Saves water by helping the soil hold moisture and reducing water runoff.
- Benefits the environment by recycling valuable organic resources and extending the life of our landfill.

Grasscycling
Go Bagless! Leaving grass clippings where they lie contributes enough organic matter and nitrogen to your lawn that fertilization needs are reduced by about 25% per year.

Keys to effective grasscycling:
- Remove only one third of the grass height each time you mow, this not only reduces the size of the clippings, it is also less stressful on the grass.
- Consistent, regular mowing reduces the chances of weeds going to seed and being dispersed naturally in your yard. Never let the grass get over 3” tall.
- Using a sharp blade makes clean cuts, thus reducing the chance for lawn diseases and pests.
- Only mow when the grass is dry.

Compost Works For You
In Yard and Garden
Compost adds nutrients and beneficial microbes, holds water, and improves plant growth. Mix compost into annual garden beds at least once a year, Spread a 1” to 6” layer of compost over the soil as a mulch, or spread sifted, weed-seed free compost on turfgrass as a top dressing.

On House Plants
Sprinkle over house-plant soil to provide nutrients or make a great potting soil by mixing one part compost with two parts sand and/or soil.

Don’t Have A Garden?
You can still make compost. Use it on a house plant, give it to a friend, sprinkle it around a street tree, or use it in a community garden.

The 4 “R’s” Of The Yard
REDUCE the amount of yard trimmings you make by planting slow-growing, drought tolerant plants.
REUSE yard trimmings by grasscycling (mowing more often, and leaving the clippings on the lawn) and by mulching fallen leaves and chipped prunings (spread them 6” deep on paths and around trees and shrubs).
RECYCLE remaining yard trimmings by composting. This brochure shows you how.
RESTORE the environment with thriving gardens. It all starts at home!
Choose A System

- Open Piles & Simple Bins are ideal for yard trimmings ONLY.
- Food waste additions require “Active” composting with weekly turning to keep animals out.
- Use a rodent-proof container with lid; or use a rodent-proof container with lid;
- Open Piles & Simple Bins are ideal for meat, bones, fish, dairy products or grease.

The Earth Machine from BRING Recycling
A local low cost example of commercially available composters. Visit or call BRING: www.bringrecycling.org
Remember: Don’t compost meat, bones, fish, dairy products or grease.

Follow The Basics
Thanks to friendly bugs and worms, composting is as easy as “1-2-3”—no matter what compost system you use!

1. CHOP materials into 6” pieces or smaller if you want them to break down more quickly.
2. MIX enough “browns” (dry, woody materials) with “greens” (moist, green materials) to create a good balance, water as needed. Add materials as often as you like.
3. MAINTAIN air and water balance by keeping compost as moist as a wrung-out sponge. Browns, Greens, Air and Water are the “big four” that will keep every compost pile happy. “Active” maintenance, turning once per week prevents animal nesting and feeding.

Harvest rich, brown, finished compost by sifting out coarse, unfinished materials after 3 to 8 months.

Hot Compost Happens when you follow the basic “1-2-3” carefully, and the pile is about a cubic yard (3’x3’x3’) or more. Placing your bin in the sun does not create hot composting, biological activity does. Biological activity produces heat, this accelerates composting and kills weed seeds and plant diseases but is not necessary. Cold, slow piles are fine but will not kill weed seeds or pathogens. If your pile is large enough, moist, and well chopped, but not heating up, you can turn it and mix in some greens like grass clippings or an organic nitrogen fertilizer. For faster hot composting and better weed-seed kill, turn or mix your hot pile about once a week or so.

REMEMBER...Composting fruit and vegetable wastes should be done in a rodent-resistant system. Use a container with a secure lid, a solid or mesh floor, and no holes bigger than 1/4 inch.

DO COMPOST:
- Most sawdusts
- Chopped, woody prunings
- Pine needles
- Fallen leaves
- Tea bags
- Citrus rinds
- Coffee grounds & filters
- Lawn clippings & young weeds
- Fruit & vegetable trimmings
- Herbivore manures

DON’T COMPOST:
- Meat, bones or fish
- Dairy products or grease
- Grains, beans or breads
- Dog, cat or bird feces
- Plywood/treated wood & its sawdust
- Diseased plants (in cold piles)
- Fruit & vegetable trimmings (in open piles/ simple bins)

Compost Bin Troubleshooting

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pile not composting</td>
<td>Too dry or the center of the pile is dry</td>
<td>Add water until slightly damp &amp; turn (mix) add fresh green wastes</td>
</tr>
<tr>
<td>Pile smells</td>
<td>Too much brown matter</td>
<td>Add fresh green matter or organic nitrogen fertilizer &amp; turn</td>
</tr>
<tr>
<td>Many flies</td>
<td>Too wet/too many food scraps or lawn clippings, not enough air</td>
<td>Bury &amp; mix food scraps into pile</td>
</tr>
<tr>
<td>Rodent damage to pile</td>
<td>Rodents in pile/ holes larger than ¼-inch/ non-compostables</td>
<td>Use traps or baits, rodent proof bin, remove meat, grease, etc., &amp; turn</td>
</tr>
<tr>
<td>The pile is damp</td>
<td>The pile is damp in the middle but nowhere else</td>
<td>Collect more material and mix the old ingredients into a new pile</td>
</tr>
</tbody>
</table>

Systems For Just Food Waste

Worm Bins
- Produces excellent fertilizer
- For indoors or outdoors
- Most fun! Takes some time and effort to separate worms from finished fertilizer if using simple bins.

The Worm Box — A self-harvesting system

The Worm Box is perfect for garage, kitchen or outside use. To order visit: www.CreateCompost.com and enter your zip code. Select the purchase option without worms and go to: www.lanecounty.org/compost for a list of local worm retailers and information on how to keep the worms working for you.

For More Information on Composting Visit:
www.lanecounty.org/compost
www.eugenerecycles.org
City of Eugene maintains compost demonstration gardens and offers other workshops.
OSU The Master Gardener Program offers compost education demonstrations and printed information from their office at 783 Grant Street in Eugene and can answer compost questions on their hotline: 541-344-0265.
Visit your local Library or book store. They are full of resources on composting.
Appendix E

Examples of Special Waste Disposal and Guides
Many common household products contain hazardous ingredients. They can pollute ground water and streams if they aren't properly handled.

Common household hazardous wastes include oil-based paints, stains, thinners and strippers, solvents, fuels and other automotive fluids, corrosive cleaners, lawn and garden chemicals, pool chemicals, fluorescent lights, ballasts and car care products. Look at labels for words like Caution, Danger, Flammable, Combustible, Corrosive, Caustic, Warning, Toxic, and Poison.

Empty containers and dried latex paint should be thrown into the trash.

Using the Household Hazardous Waste Collection Center is easy!
1. Call 541-682-4120 to make an appointment to drop off hazardous waste. Collections are scheduled on Thursdays and two Saturdays a month.
2. Keep wastes in their original labeled containers if possible, or label known items. Secure containers in a box to keep them from tipping over in transit. Bring up to 35 gallons of waste total and no empty containers.
3. Enter the Glenwood Disposal site through the center lane and follow signs to the Household Hazardous Waste Collection Center. Please stay inside your vehicle. Our staff will unload the waste for you. There is no charge for this service.

What About Business Hazardous Waste?
Businesses, agencies and organizations that generate small quantities of hazardous waste are called "Conditionally Exempt Generators" (CEGs) and may be eligible to participate in Lane County’s CEG collection program. Participating businesses must pre-register and pay disposal fees for their waste. Call 541-682-4120 for an information packet.

Business Collection
Businesses drop off material by appointment on the 2nd Wednesday of every month and pay disposal fees for hazardous materials collected.

Resident Collection
LCWMD collects hazardous waste from residents free of charge by appointment only, every Thursday and two Saturdays a month.

Rural Collection
Lane County conducts 5-6 rural Hazardous Waste Collections each year. Call 541-682-4120 or click services tab at www.lanecounty.org to find out the schedule of locations for Rural HHW collections.

Not Accepted
- Containers over 5 gallons
- Asbestos
- Commercially generated waste
- Explosives (Old road flares okay)
- Infectious waste
- Radioactive waste (Includes old smoke detectors)
- Empty containers

Accepted
- Acids and bases
- Fluorescent lamps/PCB ballasts
- Fuels/Solvents
- Household batteries
- Household cleaners
- Pesticides/Herbicides
- Paint/Stains/Strippers/Thinners
- Poisons
- Pool chemicals
- Containers (5 gal. max.)
Five Steps to Protect Your Family’s Health and the Environment

1. Avoid Household products marked “Danger”. Look for the word “danger” on cleaners, polishes, paint strippers, and pesticides. “Danger” means the product could poison you, cause serious damage to your skin or eyes, or easily cause a fire.
   - Choose products marked “caution” or “warning”, or better yet, products that don’t need warnings.
   - Choose water-based products, such as latex paint, white glue and water-based paint stripper.

2. Reduce your need for yard and garden pesticides.
   - Pesticides are poisons. Besides killing bugs and weeds, they may also poison children, irritate eyes or skin, cause cancer or kill birds and fish.
   - Build healthy soil by adding compost or aged manure and using slow-release organic fertilizers.
   - Buy plants that will grow well in this climate and in your yard—they use less water and pesticides.
   - Try alternative products to control pests, such as Teflon tape for foot weevils or soap and water solution for aphids.

3. Recycle used motor oil, oil filters and antifreeze. Used product could poison you, cause serious damage to paint strippers, and pesticides. “Danger” means the material can be more than a quarter full, solidify it by adding saw dust, cat litter, or other dry material, then throw it in the trash. Otherwise, if the latex paint can is more than a quarter full we will recycle the material.

4. Use less-toxic cleaners. Some cleaners contain very hazardous ingredients that can burn your eyes, skin or lungs. Look for safer name-brand substitutes at your local grocery store, or use simple alternatives.
   - Many everyday household products contain hazardous ingredients that can burn your eyes, skin or lungs. Look for safer name-brand substitutes at your local grocery store, or use simple alternatives.
   - There are many everyday household products we all keep on hand that can be used for cleaning without doing damage to the environment, such as; water, vinegar, baking soda, borax, mineral oil, newspapers, and rags.

5. Dispose of leftover hazardous products properly. Careless disposal of hazardous household products can pollute the environment. See disposal methods listed in this brochure or call Lane County Waste Management Division 541-684-4120.

Got Old Paint?
Latex paint is not a hazardous waste. Reduce leftover paint by buying only what you need, and using what you buy. If applying a second coat doesn’t use up leftover paint, see if friends and neighbors can use it. If your latex paint can is less than a quarter full, solidify it by adding saw dust, cat litter, or other dry material, then throw it in the trash. Otherwise, if the latex paint can is more than a quarter full we will recycle the material.

PaintCare Program
Collection Program for House Paint
PaintCare is a new statewide collection program that collects household paint only. Latex and oil base containers must be 5 gallons or less. House paint only. Cans must have labels and lids, no rusty containers. No aerosol spray cans.
Participating retail locations: (refer to www.paintcare.org for easy access to most current list)

Eugene
Forrest Paint, 990 McKinley St, 541-868-1222
Jerry’s Home Improvement, 2600 HWY 99 N, 541-689-1911
Sherwin-Williams, 1054 Green Acres Rd, 541-485-7080
Tommy’s Paint Pot, 1000 Conger St, 541-683-5851

Cottage Grove
Cascade Home Centers, 49 S 6th St, 541-942-1301

Creswell
Cascade Home Centers, 104 S Mill St, 541-895-4166

Springfield
Jerry’s Home Improvement, 2525 Olympic St, 541-736-7000

Collection sites will be added often as the program gets up and running.
Call 541-682-4120 or visit www.paintcare.org for current info.

If you have oil-based paint and stain that is not accepted at PaintCare locations, please note that it is hazardous waste and is accepted at the Household Hazardous Waste Collection Center at the Glenwood Transfer Station.

Chemical Cleaning & Gardening Products Can be Dangerous...And Expensive!

Many everyday household products contain hazardous chemicals. When you dispose of these products in the storm drain, sink or garbage, the chemicals can end up in local water bodies or groundwater.

This list of alternatives is provided to help you make responsible decisions about the safe use and disposal of household products. By trying some or all of the alternatives, you will help Lane County move toward a goal of hazard-less waste.

Make your own Greener Cleaner Kit with these few supplies:

- baking soda
- borax
- toothpaste
- liquid soap
- club soda
- baby oil
- margarine
- warm water
- lemon juice
- white vinegar
- salt
- flour
- olive or almond oil
- rubbing alcohol

Try these simple greener cleaners:

Window cleaner:
1/2 cup vinegar in 1 quart warm water, wipe with crumpled newspaper or clean cloth.

All purpose spray:
2 cups water
2 tablespoon white vinegar
1 teaspoon liquid soap
1 teaspoon borax

Pot and surface scrub:
Sprinkle with baking soda, spray with white vinegar, let bubble and sit, wipe up and rinse well.

Soap spray:
Sprinkle with baking soda, spray with white vinegar, let bubble and sit, wipe up and rinse well.

Tub and tile cleaner:
Use vinegar (full strength) on a sponge, then use baking soda as a scouring powder. Rinse well.

Make your own organic pesticides with these unique bug-buster recipes.

Soap Spray:
Stop the slugs with soapy water. Use your old, dirty dishwater by pouring it over the plants. This works really well on hostas and mums, but also can be used on other hardy plants. For a stronger solution, mix 3 tablespoons of liquid detergent into a gallon of water. Use this weekly.

Garlic Spray:
Slugs must not like eating Italian. 1 garlic bulb 1 quart of water 1 medium onion 1 tablespoon of cayenne pepper 1 tablespoon liquid dish soap Crush the garlic, mincing it fine. Add finely chopped onion to the mixture, while adding the rest of the ingredients except the soap. Wait an hour before adding the soap to the mixture. The spicy ingredients must sort of stew or steep, almost like tea. After an hour, add the soap and your non-toxic spray is ready to use! This can be stored in the fridge for a week.

Spearmint-Hot Pepper-Horseradish Spray:
This works on many different kinds of bugs. 1/2 cup of red peppers (hot) fresh water 1/2 cup of fresh spearmint 1/2 cup horseradish (root and leaves) 1/2 cup green onion tops 2 tablespoons of liquid detergent Mix all of the spearmint leaves, horseradish, onion tops and peppers together with enough water to cover everything. Strain and save the infused water. Add a half-gallon of fresh water and the detergent to the infused water. To use this solution, mix 1/2 gallon of this solution with 1/2 gallon of water. You can use this to spray almost any plant safely. Store this mixture for a few days in a cool environment.
Press Release

Effective August 30, 2013 the Joe Ney Landfill will no longer be open to the public for disposal of construction and demolition debris. Coos County will accept the debris at the Beaver Hill Transfer Station on Highway 101 and then have it transported to a landfill out of county for disposal.

The Beaver Hill site is open Tuesday through Saturday from 8:00 A.M. to 4:30 P.M.

In April of 2013 the fee for Construction/Demolition debris was set by the Coos County Board of Commissioners as follows: $20.50 @ LCY (loose cubic yard) or $87.27 @ ton if charged by the weight. The Construction/Demolition Debris will be charged for by the loose cubic yard or on its weight, whichever results in the higher gross revenue to the County.

Please remember that the County still has a disposal fee for clean wood and brush at $6.00 LCY so it may be advantageous for you to take the time to separate your materials.

If you have any questions, please do not hesitate to call us at the phone numbers listed above.
Public Service Announcement

The Beaver Hill Disposal Site is now a collection site for the Oregon Paint Recycling Program. There is no charge for the drop off of cans of leftover paint (latex or oil-based).

Please drop off your paint at the Beaver Hill Disposal Site with the traffic booth attendant. (Maximum container size of 5 gallon)

The paint products that are **accepted** at no cost at Beaver Hill are:

- Interior and Exterior Paints: Latex, Acrylic, Water-based, Alkyd, Oil-based and Enamel (all types of finishes & sheens, including textured coatings)
- Deck Coatings and Floor Paints (including elastomeric)
- Lacquers, Lacquer Sanding Sealers and Lacquer Stains
- Melamine, Metal and Rust Preventative
- Primers, Undercoating’s and Sealers
- Stains and Shellacs
- Swimming Pool Paints (single component)
- Varnishes and Urethanes (single component)
- Waterproofing, Sealers and Repellents: Concrete, Masonry, and Wood (no tar-based or bitumen-based products)
- Wood Coatings (containing no pesticides)

**Not accepted:**

- Aerosol Paints
- Automotive Paints
- Caulking Compounds, Epoxies, Glues or Adhesives
- Colorants and Tints
- Craft Paints
- Deck Cleaners
- Industrial Maintenance Coatings
- Marine Paints
- OEM and Industrial Surface Coatings, Paints and Finishes (shop application)
- Paint Additives
- Paint Thinners, Mineral Spirits or Solvents
- Pesticide Containing Products
- Resins
- Roof Patch or Repair
- Tar or Bitumen-based Products
- 2-component Coatings
Last year, the Oregon Legislature enacted a law requiring paint manufacturers to safely manage leftover latex and oil-based paint from consumer and contractor painting jobs. The state’s paint “take-back” program is funded by the recovery fee that retailers will add onto the sale of new paint and stain. There will be no fee for containers of a half pint or less. The fee is 35 cents per container between a half pint and one gallon, and 75 cents for a one-gallon container and $1.60 for containers of more than one gallon and up to five gallons.

PaintCare, a nonprofit organization created by the American Coatings Associations, a paint industry group, will run the collection program for the state. For more information on PaintCare, please visit their website: www.paintcare.org

Coos County Solid Waste Department thanks you for keeping paint and paint products out of the Beaver Hill waste incinerator and the Joe Ney construction and demolition landfill.

If you have any questions, please call 396-5444. Please leave a short message and a phone number as booth attendant may be outside with customers.

Beaver Hill Disposal Site Hours
541-396-5444
Open: Tuesday – Saturday: 8:00 A.M. to 4:30 P.M.
Closed: Sunday, Monday & Holidays

Location: ¼ mile south of milepost 253 on Highway 101
Between Coos Bay and Bandon
Appendix F

Deschutes County

Sheriff’s offices are located in Bend, Terrebonne, Sisters, & La Pine

If you have additional drop off sites to add to the inventory, please e-mail that information to: gillaspie@oracwa.org
Appendix G

Funding Resources for Waste Management
Funding Opportunities

Federal agencies that may provide funding for tribal solid waste programs.

- Department of Agriculture (USDA)
- Department of Housing and Urban Development (HUD)
- Department of Health and Human Services (HHS)
- Environmental Protection Agency (USEPA)

Some federal agencies offer financial assistance to tribes for waste management projects. Most of the grants and loans available provide money for planning, outreach and education, construction, or equipment purchase. A few grant programs allow funds to be used for program or facility operation and maintenance.

Catalogue of Federal Domestic Assistance (CFDA) – Database of all federal assistance programs including grants and loan programs. Available to state, local, and tribal governments. After identifying potential sources of funding through CFDA, tribes should then go directly to the funding agencies for application information. For further information, go to www.cfda.gov.

USDA Rural Development Solid Waste Management Grants – Helps applicants to reduce or eliminate pollution of water resources and improve planning of management of their solid waste sites. For further information, go to http://www.rurdev.usda.gov. Interested tribes may submit a pre-application using form SF 424.1, “Application for Federal Assistance (non-construction), between October 1 and December 31, to the USDA Office in your state or the USDA, Rural Development National Office in Washington, D.C.

Bureau of Indian Affairs Guarantee Loans – The program was established by the Indian Financing Act of 1974 to stimulate and increase Indian entrepreneurship and employment through establishment, acquisition or expansion of Indian-owned economic enterprises. Loans may be made to finance Indian-owned businesses organized for profit, provided that eligible Indian ownership constitutes not less than 51 percent of the business. For further information, go to http://www.doi.gov/bureau-indian-affairs.html.

Indian Health Services, Tribal Management Grant Program – Assist federally-recognized tribes and tribally-sanctioned Tribal organizations in assuming all or part of existing IHS programs, services, functions, and activities through a Title I contract and to assist established Title I contractors and Title V compactors to further develop and improve their management capability. For further information, go to: http://www.ihs.gov/NonMedicalPrograms/tmg/index.asp.

EPA American Indian Environmental Office Grants - Find information on the grant tutorial, headquarters grant application requirements and forms for environmental programs. For further information, go to http://www.epa.gov/indian/tgrant.htm.
Appendix B-1

Resources for Waste Disposal and Recycling
Coos County
**Coos County Solid Waste Department**  
**Beaver Hill Transfer Site**  
Effective 04-01-13  
(541) 396-7620 traffic booth

Appendix B-2

Resources for Waste Disposal and Recycling
Douglas County
Holiday Closures

The Roseburg Landfill and all Transfer Stations are closed on the following holidays:
- New Year's Day
- Martin Luther King Jr. Day
- Presidents’ Day
- Memorial Day
- July 4
- Labor Day
- Veteran’s Day
- Thanksgiving Day
- and Christmas Day.

Special Fees Updated

**Double fees for out-of-County waste**

What is the Landfill and what are Transfer Stations?

- Transfer Stations are facilities where general waste and recycling is collected from the public.
- The Landfill is the actual location where waste material is deposited. Other materials are also stored here for processing.

Landfill Operation Hours
Open: Wednesday to Saturday
8:00 am to 4:00 pm
Closed: Sunday, Monday and Tuesday

Roseburg Transfer Station
Open: Wednesday to Saturday
Hours 8:00 a.m. - 6:00 p.m.
Closed: Sunday, Monday and Tuesday

Glide, Reedsport, Oakland, Canyonville and Myrtle Creek Transfer Stations
Open: Wednesday to Saturday
Hours 8:00 a.m. - 6:00 p.m.
Closed: Sunday, Monday and Tuesday

Yoncalla Transfer Station
Open: Thursday to Saturday, except Closed second Saturday of month
Hours 8:00 a.m. - 6:00 p.m.
Closed: Sunday, Monday and Tuesday, Wednesday, and second Saturday of month
Glendale Transfer Station
Open: Friday and Saturday
Hours 9:00 a.m. - 5:00 p.m.
Closed: Sunday, Monday, Tuesday, Wednesday and Thursday

Camas Valley Transfer Station
Open: Thursday only
Hours 9:00 a.m. - 5:00 p.m.
Closed: Sunday, Monday, Tuesday, Wednesday, Friday and Saturday

Elkton Transfer Station
Open: Wednesday only, and also open second Saturday of month
Hours 8:00 a.m. - 6:00 p.m.
Closed: Sunday, Monday, Tuesday, Thursday, Friday and Saturday, except Open second Saturday of month

Tiller Transfer Station
Open: Wednesday only
Hours 9:00 a.m. - 5:00 p.m.
Closed: Sunday, Monday, Tuesday, Thursday, Friday and Saturday

The permit that allows for the operation of our landfill and transfer stations restricts the types of materials which may be accepted.

Only the following materials are accepted:

Accepted free of charge for County Residents at all locations:
Waste: (Limit of 5 cubic yards per day at transfer stations)
- Household Garbage
- Non-Commercial Sharps in designated containers

Recyclables:
- Paper
- Plastic
- Metal
- Glass Containers
- Wood
- Yard Debris
- Cardboard
- Auto Batteries
- Motor Oil

Fees are assessed for the following: (Double for any out-of-County waste)
Accepted only in Roseburg and Reedsport:
- Mattresses and Box Springs...$10 each unit
- Refrigerators - $15
- Washers, Dryers, Hot Water Heaters - $5
- Tires - Fee dependent upon size and must be off the rim
- Construction and demolition materials - $60/ton or $15/cubic yard is charged for limited amounts.
- Other Materials - Animal by-products, soil, vehicles, vehicle parts, stumps, sand, gravel, rock, out of county waste, commercial sharps, permitted waste...
Asbestos and Petroleum Contaminated Soil (PCS):
BY PERMIT ONLY.
Call 440-4485 to arrange for a permit for disposal

Unacceptable Materials

Certain wastes are not acceptable for disposal at Douglas County Disposal Facilities. The following materials are forbidden from disposal:
Some of these items are recyclable.

- **Liquids** For example:
  - Motor Oil
  - Cooking Oil
  - Antifreeze
  - Paint
- **Hazardous waste**
- Explosives
- Radioactive materials
- Closed barrels, tanks, or containers
- Propane tanks
- Large appliances
- **Tires**
- Mattresses and box springs
- Burn Barrels or Hot ashes
- Computers and TV monitors

*Note Regarding Unrestrained Loads*

- All unrestrained loads are subject to a $300 fine. This fine may increase for each repeated occurrence.
- An unrestrained load is defined as any load that can drop, sift, leak, blow or otherwise escape from the transporting vehicle. Trash in closed plastic bags that are below the sidewalls is acceptable. If bags are above sidewalls, they must be restrained with a rope, net or tarp. Tailgates shall be used.
The following chart is a representation of the primary recyclable materials and where to take them in Douglas County. For more detailed information go to [www.RecyclePower.org](http://www.RecyclePower.org) or call 541-440-4268

There are many more materials you can recycle or reuse in Douglas County. Go to [www.RecyclePower.org](http://www.RecyclePower.org) for details

Updated 8/28/2013
TRASH LESS!

DOUGLAS COUNTY

WHAT goes around comes around!

Want to trash less? Then start here! This is the next step!

USE YOUR IMAGINATION!
Before you recycle or trash something, think — “Can I use it again for the same thing, or maybe for something else?”

CHARGE IT!
Americans buy and trash 2 billion batteries a year. The solution? Rechargeables!

REBUILD IT!
Buy quality used building materials for your next home project from Heartwood ReSources (541-679-1777).

GIVE IT AWAY!
All kinds of folks in Douglas County are looking for your used items — computers, clothing, books, videotapes, batteries, cell phones, electronics, CDs, bubble wrap, furniture and household items, packing peanuts, eyeglasses and much more. Check out the “Materials Exchange” page at www.recyclepower.org for details, and visit www.freecycle.org to join a community exchange!

RIP IT UP!
If your used clothes are too worn or stained to give away, tear them up for rags. You can use other scrap materials for creative craft projects.

MAKE IT LAST!
Maintain and repair products instead of replacing them. Newer isn’t necessarily better.

REFILL IT!
Choose reusables over disposables, and reuse disposables if you can — companies can reload single-use toner and printer cartridges, and they are cheaper.

DON’T BUY TRASH!
Every year, the average American buys 500 pounds of packaging … then just throws it away! Above-average Americans buy products with less packaging (like bulk items, larger sizes, and concentrated liquids), fill smaller reusable containers, and save money!

STOP JUNK MAIL!
Almost 3/4 of all junk mail is never even opened. If you want to stop your name from being sold to large mailing list companies and even have it removed from existing mailing lists, go to www.stopjunkmail.org

CHOOSE RECYCLED!
More and more recycled products and packaging are available, so check the labels. More post-consumer content means fewer raw materials were used and more energy was saved. But look closely — products labeled “recyclable” may not have been recycled!

BAG AND RE-BAG!
The best grocery bags are ones you bring with you. Some stores even give you a discount of two to five cents per reused bag.

WHY REDUCE REUSE RECYCLE?
It conserves natural resources. Disposal costs are reduced. Landfill space is saved. New jobs are created. We save energy and money. Nothing goes to waste. It’s easy. You’ll feel better!

Call Douglas County Public Works:
541-440-4268

www.recyclepower.org

2012 printing

Try composting! Use Mother Nature’s Recycle Power

Thanks to natural decomposition, your food scraps and yard waste can be totally recycled at home and used to enrich your soil. Keeping biodegradable, organic garbage out of your trash also saves valuable space in our landfill!

See how it’s done! Visit the OSU Extension Service Master Gardeners’ Compost Demonstration Site near Roseburg’s River Forks Park. For more information, call 541-672-4268 or 1-800-883-7568.

Buy bins at cost! Backyard Compost Bins are sold at cost by Douglas County Public Works in partnership with local retailers. Call the number below or check out our website for details and for composting know-how (including composting with worms!).

When you’ve reduced and reused as much as you can, it’s finally time to . . .
what to recycle and how to sort and prepare it (it's easier than it looks!)

mixed paper
Includes all clean paper, magazines & fiberboard; NO SEPARATION OF DIFFERENT TYPES OF MIXED PAPER IS NECESSARY
Include white & colored paper, unwanted mail, sticky notes, envelopes, folders, index cards, notebook paper, books, newspaper, telephone books, and shredded paper. Also include all glossy paper items, such as magazines, catalogs, posters, calendars, and brochures. Single-layer fiberboard includes cereal/shoe/ tissue boxes, notepads, backs, toilet roll/paper towel cores, and soft drink/beer boxes. Just put in paper bags or loose (not in plastic bags or tied with string). OK: staples, inks, tape, NO: paper clips, glue, plastic, string, rubber bands, or pet food bags. Please recycle newspaper, corrugated cardboard, and paper grocery bags separately (see below).

newspaper
Any inserts that come in a newspaper can be recycled with it, and you can include other all-newspaper items such as coupon books. Recycle all newspaper/newsprint loose. NO: paper bags, plastic bags, or string.

corrugated cardboard
Only 3-layer cardboard (PLEASE FLATTEN) and paper grocery bags accepted. OK: Tape, staples, stickers. NO: waxed or food-contaminated cardboard. Recycle single-layer fiberboard separately with mixed paper.

fin cans/aluminum
Recycle tin and aluminum together. Include cans, cleaned aluminum foil and pie pans. Rinse well and include lids. OK: labels. NO: scrap metal or appliances (see below for recycling these separately).

clean plastic
Rinse any plastic food containers well. Recycle plastic bags and film/-wrap separately (see below). OK: jugs, bottles, labels, tubes, lids & caps, buckets, plant pots, trays, toys and hard rigid plastic. NO: motor oil containers, plastic bags, or Styrofoam.

plastic bags and film/-wrap
Most grocery stores take these. OK: ice bags, dry cleaner bags, clean trash bags, shrink wrap, bubble wrap, and lumber wrap. NO: ties, staples, hard/rigid plastic, tarp material, Styrofoam, foam wrap.

Glass cannot be commingled
Glass bottles & jars
Rinse glass well. Separate into 3 groups: CLEAR & blue • BROWN & AMBER • green. OK: labels. NO: window glass, light bulbs, mirrors, dishes, drinking glasses, ceramics, or metal. Recycle lids separately.

c-waste
(electronics)
It’s now illegal to dispose of computers, monitors, and TVs. But you can recycle them for free at locations throughout Douglas County. Most of these facilities don’t accept peripherals (mice, keyboards, etc.), but several locations in Roseburg take these and all other electronics, plus a whole lot more. Just go to www.recyclepower.org for e-Waste recycling details. Recycle large appliances separately (see below right).

yard waste
Landfill & Transfer Stations Only!
Grass, leaves, yard clippings. Free garden mulch made from your yard waste is available at the Roseburg landfill!

lumber/wood waste
Landfill & Transfer Stations Only!
Wood materials and brush only. OK: bolts, hinges, wire, concrete, or plastic (they damage our tub grinder!). Stumps over 12” diameter accepted at landfill only.

scrap metal
Transfer Stations Only!
Separate metal from other materials. OK: fencing, pipe, aluminum door and window frames and lawn furniture. Take car parts and items over 40 lbs. to scrap yard.

where to recycle
Roseburg Transfer Station
Off I-5, exit 121 – just follow the signs and put materials directly into marked bins.

Douglas County Transfer Stations
Put items in bags or boxes (where appropriate) and place in recycling sheds or designated areas. For the location nearest you, call 541-440-4268 or go to www.recyclepower.org

Local Recycling Centers
They don’t accept all materials, so phone before you go!

Sunrise Enterprises – 541-673-0195: 3443 Carnes Rd., Green 2555 W. Harvard, Roseburg
Riverbend Park – 541-679-6114: Thompson Street, Winston

Residential Curbside Pick-up
In Roseburg, Sutherlin, Winston & Reedsport not all materials accepted in Curbside collection. Contact your local hauler for details.

Limited Locations Only

Do Not Take to Sunrise Enterprises

Special recyclables

Usable lumber & building supplies
Take yours to Heartwood ReSources in Roseburg.

Tires
Roseburg and Reedsport Transfer Stations Only
Trashing or burning tires is illegal & polluting. Fee: $2 per car tire; $6 per pickup truck tire.

Waste Residential Appliances
Roseburg and Reedsport Transfer Stations Only
$5 Fee: washer • Dryer • Dishwasher • oven • water heater $15 Fee: Refrigerator • freezer • Air conditioner $25 Fee: Commercial size appliances

Mattresses and box springs
Roseburg and Reedsport Transfer Stations Only
These items are now banned from disposal. They are shipped off-site for recycling. Fee is $4 for each piece.

Reusable clothing & household items
Take these to any thrift or resale store. You can also check out the “Exchange” page at www.recyclepower.org to find folks looking for all kinds of used items.

Antifreeze
Collect in non-breakable containers and take to any auto repair shop. (Fee may apply.)

Used motor oil & auto/boat batteries
Not accepted at Sunrise enterprises
Collect oil in non-breakable containers with tight lids. Empty into marked tanks and dispose of containers in the trash. Used motor oil and lead-acid batteries accepted free of charge at all Douglas County Transfer Stations.

**Rural Recycling Guide**

It is against State Law to put the following items in the garbage: Motor Oil, Lead-acid Batteries, Appliances, Auto Tires, Computers, Laptops and Televisions.

**Tips for Self Haulers**
If you’re coming in to one of our transfer stations, keep these tips in mind:

- Load your vehicle garage first and recycling last so you can easily drop off recyclables first and get the $1 credit slip before you dump.
- Cover your load. If you show up at our sites with an uncovered load, your fees could double. This is to keep our roadsides free of litter.
- Garage costs money to dispose of. Reduce, Reuse & Recycle at home so you have less garbage when you get here.
- Pesticides, chemical cleaners, glues, and solvents are dangerous in the trash. Call 541-682-3111 to make a free disposal appointment or to learn about annual rural collection days.

### Special Instructions for two sites only!

**Sharps Creek Transfer Site** only accepts a commingled blend of the following materials: Newspaper, Magazines, Plastic bottles, tubs & jugs, Cans & foil, Milk cartons. Preparation of these materials must comply with the chart on left. Glass bottles & jars are collected separately. Sharps Creek does not accept Scrap metal, Appliances, Propane tanks or Auto batteries.

**Walton Transfer Site does not accept** Scrap metal, Appliances, Propane tanks or Auto batteries.

Due to the high costs of recycling certain items, the items here can be recycled at rural recycling sites for a fee.

### Did you know...
- Making paper from recycled fiber generates 75% less air pollution.
- Aluminum made from recycled cans uses 95% less energy than if made from virgin (bauxite) ore.
- The amount of tin ore left in the world will last only 31 years if use grows at projected rates.
- One pint of used motor oil can create a poisonous slick one-acre in size.
- 30% of municipal solid waste is made up of packaging.

Avoiding over-packaged items saves you money at both the grocery store and at the disposal site.
Recycler’s Guide to Plastics Recycling

The value of plastics recycling is growing, but not all plastic can be recycled. Please help recycle more by following the guidelines:

- Identify if it is a bottle, tub, jar or jug shape. If it is NOT one of these shapes, look for a recycler under “Where to Take Other Plastics” in this brochure, or toss it in the garbage.
- Remove and throw away caps, lids, spray pumps, or any other attachments. These items contaminate the recycling.
- Rinse the container! You don’t need to remove labels.
- Do NOT crush. Do not nest containers (unless they are same thing).

Plastics: Numbers alone don’t work to determine recyclability.

If it’s not a BOTTLE, TUB, JAR OR JUG, then it’s NOT recyclable in mixed plastic collections.

(This includes curbside collections, contact your hauler for details)

The Recycle Symbol does NOT indicate that an item is recyclable in your area. It only indicates what an item is made of.

YES!
- RECYCLE these plastic containers. Rinse before recycling.
  - Soft drink bottles
  - Milk, juice, & water jugs
  - Margarine tubs
  - Liquid detergent bottles
  - Shampoo & conditioner bottles
  - Windshield fluid bottles
  - Bags & film, in separate bin at transfer stations

NO!
- DON’T RECYCLE See next page for recycle options.
  - Meat trays
  - Loose lids, caps, & spray pumps
  - Food storage containers
  - Tray or flexible plastics
  - Toys
  - Garden hose
  - Lawn furniture
  - Motor oil bottles
  - Pesticide containers
  - Prescription bottles
  - Plastic labeled “Bio” or #7
Compostable Plastics are NOT Recyclable.

If your container has a #7 or the PLA marking, it should NOT be recycled with any plastic recycling program listed here—regardless of its shape.

This new type of plastic may have composting options when delivered to a commercial compost facility, but it is a terrible contaminant to recycling other plastics.

Contact Lane County’s Waste Reduction Specialist if you have more questions regarding plastics recycling in Lane County: 541-682-4339.

For more information about plastic recycling, call: Lane County Waste Reduction Specialist at: 541-682-4339.

1 - PET/PETE (polyethylene terephthalate) Beverage bottles, jars, food trays,

2 - HDPE (high density polyethylene) Milk jugs, bottles, yogurt tubs, grocery bags.

3 - V (Vinyl) or PVC Cooking oil bottles, meat wrap, window, pipe, cables.

4 - LDPE (low density polyethylene) Bags-produce, bread & flexible package shrink wrap.

5 - PP (polypropylene) Yogurt tubs, straws, syrup bottles, margarine tubs.

6 - PS (polystyrene) Can be foamed or rigid Meat trays, egg cartons, cups, CD cases, desk organizers.

7 – OTHER (this is for All other materials & combinations), compostable, PLA, tennis ball tubes.

Where to Take Other Plastics That Are Recyclable

Do NOT place the following items in the curbside bins or mixed plastic collections!

Plastic buckets, toys, structures, furniture, Rubbermaid type containers—Call: International Paper at 541-744-4100.

Packing peanuts—Must be clean and dry. Accepted for reuse at packaging and mailing stores. Or, call The Peanut Hotline at 800-828-2214.

Block foam (Styrofoam™)—Households can recycle small quantities of Styrofoam™ at no charge. St. Vincent de Paul accepts block foam and peanuts, NO food containers, trays or cups. Small fee for businesses. Call: 541-345-0595.

Why Only Bottles, Tubbs, Jars and Jugs?

So the numbers alone are not enough—shape is now important to describe what can and cannot be recycled.

Here’s an example: PET #1 plastic resin is made into water bottles by heating it to high temperatures and injection molding it. But the same resin can be melted to a lower temperature in the thermoforming process to make a tray. These two plastic items are made from the same base resin (#1 PET) but are not both equally recyclable because the different shaping processes create different plastic. Many manufacturers will pay for #1 bottles to make new products, but very few are willing to pay for #1 trays at this time.

Manufacturers need very large quantities of a single material in a consistent supply to make their products. In order to supply this, recyclers can use sorting systems to separate resin types, IF the material is the correct shape. When plastic trays contaminate the bottles that a manufacturer purchases as their raw material, their products will have flaws and will not be marketable.

The science and mechanics of shaping plastic resins into product shapes are such that once a resin is manipulated into a shape it is changed forever and it cannot be combined with other shapes to be recycled, even if the resin is the same! (Much like a fried egg cannot be recycled into a hard-boiled egg).

Glass Jars & Bottles

ALL SITES

- Rinse
- Remove lids
- Labels okay
- Separate by colors: brown, clear & green

NO

- window glass
- drinking glass
- light bulbs
- Pyrex®
- lids
YES  Cans & Foil  Tin/Steel Cans • Aluminum

All SITES
(SEPARATE TIN/STEEL CANS FROM ALUMINUM)
(USE A MAGNET, it attracts tin/steel cans)

- Rinse
- Lids on or off
- Labels okay

MUST BE 100% EMPTY

NO  aluminized plastic bags

NO DIRTY CONTAINERS

2
YES Plastic Bottles, Tubs, Jars & Jugs

ALL SITES

• Rinse
• Drip dry
• Remove caps & lids

NO

lids (place in provided separate container)

• other shapes
• to-go plastic containers
• containers less than 6 oz.
• compostable (#7 PLA)

Styrofoam

buckets
YES

Milk Jugs
“natural” HDPE bottles / jugs
(“NATURAL” = SEE-THROUGH)

ALL SITES
(PUT IN MIXED PLASTIC IF SEPARATE BIN IS NOT AVAILABLE)

• Rinse
• Drip dry
• Remove caps/lids

NO

• small containers
  (less than 6oz.)
• solid white jugs

(place these in “mixed” plastics)
YES Plastic Bags

ALL SITES: EXCEPT SHARPS CREEK

- Completely remove contents
- Turn inside out & shake to clean

NO

- air bubble packs
- bubble wrap
- trash bags black bags

(unless ALL air is removed)
**YES Plastic Plant Pots & Trays** (all shapes and sizes)

COLLECTED AT GLENWOOD ONLY!

- Must be free of dirt

**Not Accepted At This Time**

**NO**

- dirt

6
YES  Low Grade Paper

ALL SITES
(RURAL SITES HAVE SEPARATE BIN FOR MAGAZINES)

• Flatten cereal boxes
• Remove plastic liners & wrapping
• Open mail & remove plastic & other contaminants

NO  FOOD PAPERS of any kind: No plates, cups, napkins, to-go boxes, frozen food boxes, etc.

Tissue, diapers, or paper towels
YES  High Grade Paper

COLLECTED SEPARATELY AT GLENWOOD & FLORENCE. ALL OTHER SITES, PUT IN LOW GRADE PAPER BIN.

NO fluorescent or bright colored paper, glossy paper, catalogs or magazines

recycle THESE in Low Grade Paper
YES
ALL SITES

Aseptic Beverage & Soup Boxes
Paper Milk Cartons

• Rinse
• Dry
• Remove lids & straws

NO

frozen food cartons

beverage pouches
YES
Newspaper

ALL SITES

• All newspaper, ads & paper inserts

NO

• plastic wrappers/bags
• non-paper free samples or promotions
• brown paper bags
YES Corrugated Cardboard & Brown Paper Bags

ALL SITES

- Look for wavy inner layer:
- Remove contents & flatten boxes

NO
- other paper boards or packing material
- waxed cardboard
- dirty pizza boxes
Yes

Scrap Metal
Items that are 75% metal or more

All Sites: Except Sharps Creek

- Barrels, containers & tanks must have ends removed or fist-size holes visible from all sides
- Empty all fluids

Nails and small stuff (use barrel provided)

(REMOVE GLASS PLATE)

No

- Pressurized containers
- Refrigerators, freezers, air conditioners, water coolers, heat pumps, dehumidifiers
- Liquids
YES Electronic Waste

ONLY ACCEPTED @ COTTAGE GROVE, FLORENCE, GLENWOOD, OAKRIDGE, VENETA & VIDA!

- Keyboards, printers, mice
- Phones
- Stereos
- TVs, VCRs, DVDs
- Other media electronics

Maximum 7 items per visit

NO

- commercial or industrial units
- floor-standing-copiers
- no speakers, reel-to-reel, or packaging
- broken or dismantled items must be contained in bag or box (fees may apply)
YES  Sharps (Needles)  
Lancets & other medical sharps

ALL SITES: EXCEPT SHARPS CREEK

• Pack in rigid, red, sealed container (red or orange laundry detergent container okay)
• Make sure lid is secure
• Household sources only

NO
• other containers such as glass, milk jugs or non-rigid containers
• material from commercial sources, clinics, etc.
YES

ALL SITES: EXCEPT SHARPS CREEK

Auto Batteries
All types & sizes of auto & other lead-acid batteries
YES

ALL SITES: EXCEPT SHARPS CREEK

• All button & rechargeable batteries
• All NiCad, Lithium, Silver Oxide & Mercury batteries
• Alkaline batteries older than 1996

Household Batteries

NO

• alkaline batteries made after 1996 Sizes AAA-D (okay to toss in garbage)
• commercial or industrial batteries
YES Antifreeze  
Place on cart or pour into drums at rural sites

ALL SITES: EXCEPT SHARPS CREEK

- Store in unbreakable containers
- Secure lid

For Residential Use only
Maximum 15 gallons

Note: Original empty antifreeze containers are NOT recyclable

NO  
- contaminants (oil, fuel, etc.)
YES
Motor Oil place on cart
Oil Filters place in drum
or place into drums at rural sites

ALL SITES: EXCEPT SHARPS CREEK

• Store in unbreakable containers with secure lid

For Residential Use only
Maximum 15 gallons

Note: Original empty motor oil containers are NOT recyclable

NO
• contaminants
• business or farm collection
• brake fluid
• gasoline/diesel/solvents
• water
• vegetable oil
YES Wood Waste
fee item, see your fee collector

ONLY ACCEPTED @ COTTAGE GROVE, FLORENCE, GLENWOOD!

- Broken furniture
- Painted wood
- Particle board
- Pallets
- Pressure treated wood
- Wood with nails or screws

NO

- Formica laminated wood
- Foam core or plastic coated wood
- Hardware bigger than your thumb
- Mixed materials
- Railroad ties
YES Yard Debris
fee item, see your fee collector

ONLY ACCEPTED @ COTTAGE GROVE, FLORENCE & GLENWOOD!

• Cut grass
• Brush
• Leaves
• Limbs under 12” diameter

NO

• limbs over 12” diameter
• stumps, and root wads (accepted in wood waste if dirt-free, or place in garbage)
• lumber
YES

Propane Tanks & Disposable Helium Tanks

(No other compression tanks)

fee item, see your fee collector

ALL SITES: EXCEPT SHARPS CREEK

NO

• other containers or product types
